World War II and American Racial Politics Steven White, 2019-07-11 World War II played an important role in the trajectory of race and American political development but the War's effects were much more complex than many assume Steven White offers an extensive analysis of rarely utilized survey data and archival evidence to assess white racial attitudes and the executive branch response to civil rights advocacy He finds that contrary to conventional wisdom the white mass public's racial policy attitudes largely did not liberalize during the war against Nazi Germany In this context advocates turned their attention to the possibility of unilateral action by the president emphasizing a wartime civil rights agenda focused on discrimination in the defense industry and segregation in the military This book offers a reinterpretation of this critical period in American political development as well as implications for the theoretical relationship between war and the inclusion of marginalized groups in democratic societies

A Paradigm of Care Robert Stake, Merel Visse, 2021-01-01 Remember the pots hammered by spoons from high Manhattan windows and parades of cars and pick up trucks holding dear the medical professionals responding to covid 19 This book is part of that chorus that march to express appreciation for the giving of care And beyond doctors and nurses bless their hearts to mothers caring for their babies for captains for their teams for the soon to be widowers for their wives and teachers for their students but also for the ranchers for their cattle and the contemplative world for our environment This is a book to think more closely of the support for care individual as it so often will be to be woven more closely together in a paradigm of care Care is always prominent Care for others of the family care for those of the tribe care for animals and homes and gardens and properties self care And the purse Even without teaching

compensation or legislation care survives but even with these helpings it falls short of the need We live in a crisis of care Thinking explicitly and beyond health care There is no mechanism of state and conscience that delivers care to all the venues of need and seldom in the amounts needed The reservoirs of care are far from empty but at a mark that needs topping up There is need for care advocacy a care ethic a paradigm This book is about that paradigm A care paradigm may bring comfort and recovery more fully to the people and organic creations of the world The paradigm hears the moan of indifference It draws upon the eyes of the heart The paradigm is about how we see the need for care The care paradigm the grand beholding is manifest in how we provide for others how we nurture them give succor how we are disposed and are not to sacrifice to relieve their hurt It is not only caring for those visibly needing care unable to care for themselves but caring for all It is having a disposition that the hurts large and small that all of us carry arouse concern and appreciation from and for each individual the community and the world
