Knowledge and Memory: the Real Story Robert S. Wyer, Jr., 2014-01-02 Narrative forms of mental representation and their influence on comprehension communication and judgment have rapidly become one of the main foci of research and theory in not only psychology but also other disciplines including linguistics sociology and anthropology No one has been more responsible for the awakening of interest in this area than Roger Schank and Bob Abelson In their target article they argue that narrative forms of mental representation or stories are the basic ingredients of social knowledge that play a fundamental role in the comprehension of information conveyed in a social context the storage of this information in memory and the later communication of it to others After explicating the cognitive processes that underlie the construction of narratives and their use in comprehension memory and communication the chapter authors consider the influence of stories on a number of more specific phenomena including political judgment marital relations and memory distortions that underlie errors in eyewitness testimony The provocativeness of the target chapter is matched by that of the companion articles each of which not only provides an important commentary on Schank and Abelson's conceptualization but also makes an important contribution to knowledge in its own right The diversity of perspectives reflected in these articles whose authors include researchers in linguistics memory and comprehension social inference

cognitive development social judgment close relationships and social ecology testifies to the breadth of theoretical and empirical issues to which the target chapter is potentially relevant This volume is a timely and important contribution to research and theory not only in social cognition but in many other areas as well *2022 Computer Science - Editor's Pick* Kaleem Siddiqi,Roberto Therón,Kostas Karpouzis,Sven Schewe,Nicola Zannone,Marcello Pelillo,Kristof Van Laerhoven,Paul Lukowicz,2023-04-06 Shape Perception in Human and Computer Vision Sven J. Dickinson,Zygmunt Pizlo,2013-06-29 This comprehensive and authoritative text reference presents a unique multidisciplinary perspective on Shape Perception in Human and Computer Vision Rather than focusing purely on the state of the art the book provides viewpoints from world class researchers reflecting broadly on the issues that have shaped the field Drawing upon many years of experience each contributor discusses the trends followed and the progress made in addition to identifying the major challenges that still lie ahead Topics and features examines each topic from a range of viewpoints rather than promoting a specific paradigm discusses topics on contours shape hierarchies shape grammars shape priors and 3D shape inference reviews issues relating to surfaces invariants parts multiple views learning simplicity shape constancy and shape illusions addresses concepts from the historically separate disciplines of computer vision and human vision using the same language and methods
