**Problems Through Media** Roberta Goldberg, 2015-11-17 Goldberg uses a multi media approach to critically examine the most significant and volatile issues of our times the environmental crisis upheavals in the developing world health terrorism and technology The book is unique in its in depth coverage of these pressing social concerns and its use of extensive media resources through a companion website An introductory section reviews basic sociological concepts and theories including the sociological imagination and class gender and race stratification all of which are revisited in each chapter The book helps students appreciate the magnitude of the problems of the twenty first century as they develop the intellectual tools to understand them sociologically and personally Features of the text      The Stupidity Epidemic Joel Best, 2012-08-06 Critics often warn that American schools are failing and that our students are ill prepared for the challenges the future holds and may even be the dumbest generation We can think of these claims as warning about a Stupidity Epidemic This essay begins by tracing the history of the idea of that American students teachers and schools are somehow getting worse the record shows that critics have been issuing such warnings for more than 150 years It then examines four sets of data that speak to whether educational deterioration is taking place First data on educational attainment show a clear trend more students are getting more education Second standardized test scores suggest that American students are performing somewhat better certainly most test scores do not indicate that students are getting worse Third measures of popular knowledge also show evidence of improvement Fourth there is clear evidence that IQ scores have been rising In other words the best available evidence fails to support claims about a Stupidity Epidemic The essay then turns to exploring several reasons why belief in educational decline is so common and concludes by suggesting some more useful ways to think about educational problems The goal of this new unique Series is to offer readable teachable thinking frames on today s social problems and social issues by leading scholars all in short 60 page or shorter formats and available for view on <http://routledge.customgateway.com/routledge/socialissues.html> For instructors teaching a wide range of courses in the social sciences the Routledge Social Issues Collection now offers the best of both worlds originally written short texts that provide overviews to important social

issues as well as teachable excerpts from larger works previously published by Routledge and other presses      **Making Sense of Social Problems** Joel Best, Scott R. Harris, 2022 Internet addiction Cell phone distracted drivers Teen suicide Economic recession The health risks of trans fats The carefully selected collection of case studies in **Making Sense of Social Problems** is designed to help students understand and critically evaluate a wide range of contemporary social issues The cases are organized to highlight a series of key elements why objective claims deserve critical attention how advocates bring attention to issues why expert interpretations may change over time the role of the media in shaping or distorting concerns and the consequences of public policy The introduction conclusion and section notes provide a coherent framework for the text Reflecting the promise of the constructionist approach the result is a powerful set of tools for systematically investigating social problems It can be used to advantage as a stand alone as well as with such texts as Joel Best's **Social Problems**
