The Five Volume Series on Regional Development: Theory and Practice is a festschrift dedicated to Professor R P Misra, a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India. This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking, researching and writing about development in general and regional development in particular. These five volumes each dealing with a specific aspect of regional development: Vol 1 Concept of Regional Development, Vol 2 Measuring Development, Vol 3 Development Patterns and Structures, Vol 4 Development Policies and Vol 5 Development Challenges. Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development, contemporary development in the discipline and the contrarian views expressed by various academics and policy makers. Another significant aspect of these introductions is the global view and a comparative scenario of the developed, developing and under developed economies of the world that the editors have kept in view in a debate seeking an

universal theory of regional development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints

Dodgshon, 1998-08-13 Table of Contents *Seeking Spatial Justice* Edward W. Soja, 2013-11-30 In 1996 the Los Angeles Bus Riders Union a grassroots advocacy organization won a historic legal victory against the city's Metropolitan Transit Authority The resulting consent decree forced the MTA for a period of ten years to essentially reorient the mass transit system to better serve the city's poorest residents A stunning reversal of conventional governance and planning in urban America which almost always favors wealthier residents this decision is also for renowned urban theorist Edward W Soja a concrete example of spatial justice in action In *Seeking Spatial Justice* Soja argues that justice has a geography and that the equitable distribution of resources services and access is a basic human right Building on current concerns in critical geography and the new spatial consciousness Soja interweaves theory and practice offering new ways of understanding and changing the unjust geographies in which we live After tracing the evolution of spatial justice and the closely related notion of the right to the city in the influential work of Henri Lefebvre David Harvey and others he demonstrates how these ideas are now being

applied through a series of case studies in Los Angeles the city at the forefront of this movement Soja focuses on such innovative labor community coalitions as Justice for Janitors the Los Angeles Alliance for a New Economy and the Right to the City Alliance on struggles for rent control and environmental justice and on the role that faculty and students in the UCLA Department of Urban Planning have played in both developing the theory of spatial justice and putting it into practice Effectively locating spatial justice as a theoretical concept a mode of empirical analysis and a strategy for social and political action this book makes a significant contribution to the contemporary debates about justice space and the city *History, Space and Place* Susanne Rau, 2019-03-05 Spaces too have a history And history always takes place in spaces But what do historians mean when they use the word spaces And how can spaces be historically investigated Susanne Rau provides a survey of the history of Western concepts of space opens up interdisciplinary approaches to the phenomenon of space in fields ranging from physics and geography to philosophy and sociology and explains how historical spatial analysis can be methodologically and conceptually conceived and carried out in practice The case studies presented in the book come from the fields of urban history the history of trade and global history including the history of cartography but its analysis is equally relevant to other fields of inquiry This book offers the first comprehensive introduction to the theory and methodology of historical spatial analysis Supported by Open Access funds of the University of Erfurt *Resilience and Regional Development* Gabriela C. Pascariu, Ramona Țigănașu, Karima Kourtit, Peter Nijkamp, 2023-08-14 Interdisciplinary in its approach with expert contributors from diverse backgrounds Resilience and Regional Development brings to light the significance of multiple dimensions of resilience and its implications for the economy Bookseller and the Stationery Trades' Journal , 1981 **Urbanization and Production of Space** Chao Ye, Liang Zhuang, 2023-05-18 This book studies China's urbanization with the theory of production of space The authors redefine the production of space and build a new theoretical framework for understanding the evolving relations between urbanization and spatial production Since the reform and opening up especially in the last twenty years the logic of spatial production has dominated China's urbanization The authors choose the most representative cases such as the Yangtze River Delta Urban Agglomeration Jiangsu Province National High tech Industrial Development Zone New Urban District State Level New Area University Town and some villages to conduct a series of empirical studies on production of space at the macro meso and micro scales Through an in depth analysis of the interaction between social spaces and urbanization influenced by power capital and class the book reveals that the essence of China's urbanization is dominated by the logic of spatial production The authors finally propose that an important shift toward humanism should be made in the future development of China's new type urbanization emphasizing more even and adequate development between different regions and between urban and rural areas which also provides new ideas for the theory and practice of urbanization worldwide This book can be read and referenced by researchers in the fields of urban and regional studies geography sociology urban and rural planning management etc It can
