The provision of state funded and democratically accountable care services represents one of the most potentially transformative advances in gendered social relations and equality for women by defamilizing care and providing paid work. But the cost of providing these services which women have access to them and how they should be provided are always at the forefront of debate especially during economic crises. Socially funded and publicly accountable care services are therefore a key site of feminist activity but also the frontline for spending cuts and reform during times of austerity. *Gender Equality in Public Services* analyses how gender equality work in British public services is changing in response to factors including equality legislation the erosion of local democracy privatisation of public services and new forms of feminist activism and leadership. It also assesses the challenges and opportunities for promoting women's equality in producing and using public services. Impacting upon developed and developing economies the arguments in this challenging book explore the potential of equality and feminist activism and leadership for radical and transformational change. It will appeal to advanced students researchers and practitioners interested in social policy feminist organization theory equal opportunities and gender mainstreaming practice.

*Reconfiguring Citizenship* Mehmooda Moosa-Mitha, 2016-03-23 Citizenship as a status assumes that all those encompassed by the term citizen are included albeit within the boundaries of the nation state. Yet citizenship practices can be both inclusionary and exclusionary with far reaching ramifications for both nationals and non nationals. This volume explores the concept of citizenship and its practices within particular contexts and nation states to identify whether its claims to inclusivity are justified. This will show whether the exclusionary dimensions experienced by some citizens and non citizens are linked to deficiencies in the concept country specific policies or how it is practised in different contexts. The interrogation of citizenship is important in a globalising world where crossing borders raises issues of diversity and how citizenship status is framed. This raises the issue of human rights and their protection within the nation state for people whose lifestyles differ from the prevailing ones. Besides highlighting the importance of human rights and social justice as integral to citizenship it affirms the role of the nation state in safeguarding these matters. It does so by building on Indigenous peoples insights about linking citizenship to connections to other people and the environment and arguing for the inalienability and portability of citizenship rights guaranteed collectively through international level agreements. These issues are of particular concern to social workers given that they must act in accordance with the principles of democracy equality and empowerment. However citizenship issues are often inadequately articulated in social work theory and practice. This book redresses this by providing social workers with insights

knowledge values and skills about citizenship practices to enable them to work more effectively with those excluded from enjoying the full rights of citizenship in the nation states in which they reside      The Social Science Encyclopedia Adam Kuper, 2004-10-14 The Social Science Encyclopedia first published in 1985 to acclaim from social scientists librarians and students was thoroughly revised in 1996 when reviewers began to describe it as a classic This third edition has been radically recast Over half the entries are new or have been entirely rewritten and most of the balance have been substantially revised Written by an international team of contributors the Encyclopedia offers a global perspective on key issues within the social sciences Some 500 entries cover a variety of enduring and newly vital areas of study and research methods Experts review theoretical debates from neo evolutionism and rational choice theory to poststructuralism and address the great questions that cut across the social sciences What is the influence of genes on behaviour What is the nature of consciousness and cognition What are the causes of poverty and wealth What are the roots of conflict wars revolutions and genocidal violence This authoritative reference work is aimed at anyone with a serious interest in contemporary academic thinking about the individual in society      The Oxford Handbook of Superdiversity Fran Meissner, Nando Sigona, Steven Vertovec, 2023 Superdiversity is one of the most prominent contemporary concepts advancing our current understanding of international migration and its societal outcomes This Handbook brings together chapters that link the numerous social scientific debates approaches and methodologies developed in light of superdiversity The handbook offers students educators researchers and practitioners a much sought after compendium of major advances made in studying complex transformations in light of superdiversity      *Encyclopedia of Social Work* , 1965      *Exploring Welfare Bricolage in Europe's Superdiverse Neighbourhoods* Jenny Phillimore, Hannah Bradby, Tilman Brand, Beatriz Padilla, Simon Pemberton, 2021-05-24 Migration driven diversity means European cities are becoming increasingly superdiverse Some European neighbourhoods have become places where newcomers arrive from across the world speaking many different languages from a range of socio economic backgrounds and with diverse religious beliefs and practices while living alongside long established migrant and white European populations This book focuses on what this increasing population diversity means for how people and local health and welfare service providers seek to address everyday health concerns from minor and chronic conditions to acute and urgent problems Using an innovative mixed method approach crossing multiple disciplines and drawing together rich qualitative and robust quantitative data this book offers unique insight into the complex and intricate actions which often vary over space and time implemented by both residents and care providers from eight superdiverse localities in four European countries each with different health and welfare traditions The book introduces the concept of welfare bricolage using it as a mechanism to explore the structures and rationales underpinning need and actions and how resources are connected across welfare regimes and borders and within locales The book illustrates how in the face of increasingly marketised cash strapped restrictive and institutionally racist welfare states and healthcare regimes individuals and service
