In this influential work of social and political theory Spencer lays out the basic principles of his philosophical system. He advocates for individual freedom and the importance of evolution in shaping social structures. Excerpt from *Social Statics or the Conditions Essential to Human Happiness Specified and the First of Them Developed*: Possibly the relaxations of style in some cases used will be censured as beneath the gravity of the subject. In defence of them it may be urged that the measured movement which custom prescribes for philosophical works is productive of a monotony extremely repulsive to the generality of readers. That no counterbalancing advantages are obtained the writer does not assert. But for his own part he has preferred to sacrifice somewhat of conventional dignity in the hope of rendering his theme interesting to a larger number.
