Stirring The Mud On Swamps Bogs And Human Imagination:

Stirring the Mud Barbara Hurd, 2008-06-01 In these nine evocative essays Barbara Hurd explores the seductive allure of bogs swamps and wetlands Hurd's forays into the land of carnivorous plants swamp gas and bog men provide fertile ground for rich thoughts about mythology literature Eastern spirituality and human longing In her observations of these muddy environments she finds ample metaphor for human creativity imagination and fear

Walking the Wrack Line Barbara Hurd, 2008 This final volume in the author's trilogy which began with *Stirring the Mud* and *Entering the Stone* gives nature writing a human dimension and throws light on the mysterious and overlooked wonders on beaches as far flung as Morocco St Croix or Alaska and as familiar as California and Cape Cod

Writing the Environment in Nineteenth-Century American Literature Steven Petersheim, Madison Jones IV, 2015-09-17 The nineteenth century roots of environmental writing in American literature are often mentioned in passing and sometimes studied piece by piece *Writing the Environment in Nineteenth Century American Literature: The Ecological Awareness of Early Scribes of Nature* brings together numerous explorations of environmentally aware writing across the genres of nineteenth century literature Like Lawrence Buell the authors of this collection find Thoreau's writing a touchstone of nineteenth century environmental writing particularly focusing on Thoreau's claim that humans may function as scribes of nature However these studies of Thoreau's antecedents contemporaries and successors also reveal a range of other writers in the nineteenth century whose literary treatments of nature are often more environmentally attuned than most readers have noticed The writers whose works are studied in this collection include canonical and forgotten writers men and women early nineteenth century and late nineteenth century authors pioneers and conservationists They drew attention to the conflicted relationships between humans and the American continent as experienced by Native Americans and European Americans Taken together these essays offer a fresh perspective on the roots of environmental literature in nineteenth century American nonfiction fiction and poetry as well as in multi genre compositions such as the travel writings of Margaret Fuller Bringing largely forgotten voices such as John Godman alongside canonical voices such as Nathaniel Hawthorne Herman Melville Walt Whitman and Emily Dickinson the authors whose writings are studied in this collection produced a diverse tapestry of nascent American environmental writing in the nineteenth century From early nineteenth century writers such as poet Philip Freneau and novelist Charles Brockden Brown to later nineteenth century conservationists such as John James Audubon and John Muir *Scribes of Nature* shows the development of an environmental consciousness and a growing conservationist ethos in American literature Given their often surprisingly healthy respect for the natural environment these nineteenth century writers offer us much to consider in an age of environmental crisis The complexities of the supposed nature culture divide still work into our lives today as economic and environmental issues are often seen at loggerheads when they ought to be seen as part of the same conversation of what it means to live healthy lives and to pass on a healthy world to those who follow us in a world where human activity is becoming

increasingly threatening to the health of our planet *Swamp Souths* Kirstin L. Squint, Eric Gary Anderson, Taylor Hagood, Anthony Wilson, 2020-03-04 *Swamp Souths* Literary and Cultural Ecologies expands the geographical scope of scholarship about southern swamps Although the physical environments that form its central subjects are scattered throughout the southeastern United States the Atchafalaya the Okefenokee the Mississippi River delta the Everglades and the Great Dismal Swamp this evocative collection challenges fixed notions of place and foregrounds the ways in which ecosystems shape cultures and creations on both local and global scales Across seventeen scholarly essays along with a critical introduction and afterword *Swamp Souths* introduces new frameworks for thinking about swamps in the South and beyond with an emphasis on subjects including Indigenous studies ecocriticism intersectional feminism and the tropical sublime The volume analyzes canonical writers such as William Faulkner Zora Neale Hurston and Eudora Welty but it also investigates contemporary literary works by Randall Kenan and Karen Russell the films *Beasts of the Southern Wild* and *My Louisiana Love* and music ranging from swamp rock and zydeco to Beyoncé's visual album *Lemonade* Navigating a complex assemblage of places and ecosystems the contributors argue with passion and critical rigor for considering anew the literary and cultural work that swamps do This dynamic collection of scholarship proves that swampy approaches to southern spaces possess increased relevance in an era of climate change and political crisis *Forested Wetlands of the Southern United States*, 2001 *From Swamp to Wetland* Chris Wilhelm, 2022-08-01 This book chronicles the creation of Everglades National Park the largest subtropical wilderness in the United States This effort which spanned 1928 to 1958 was of central importance to the later emergence of modern environmentalism Prior to the park's creation the Everglades was seen as a reviled and useless swamp unfit for typical recreational or development projects The region's unusual makeup also made it an unlikely candidate to become a national park as it had none of the sweeping scenic vistas or geological monuments found in other nationally protected areas Park advocates drew on new ideas concerning the value of biota and ecology the importance of wilderness and the need to protect habitats marine ecosystems and plant life to redefine the Everglades Using these ideas the Everglades began to be recognized as an ecologically valuable and fragile wetland and thus a region in need of protective status While these new ideas foreshadowed the later emergence of modern environmentalism tourism and the economic desires of Florida's business and political elites also impacted the park's future These groups saw the Everglades' unique biology and ecology as a foundation on which to build a tourism empire They connected the Everglades to Florida's modernization and commercialization hoping the park would help facilitate the state's transformation into the Sunshine State Political conservatives welcomed federal power into Florida so long as it brought economic growth Yet even after the park's creation conservative landowners successfully fought to limit the park and saw it as a threat to their own economic freedoms Today a series of levees on the park's eastern border marks the line between urban and protected areas but development into these areas threatens the park system Rising sea levels caused by global warming are another threat to the future of the

park The battle to save the swamp s biodiversity continues and Everglades Park stands at the center of ongoing restoration efforts

General Technical Report SRS ,1995 Creative Engagements with Ecologies of Place Mary Modeen,Iain Biggs,2020-12-28 This book explores an exciting range of creative engagements with ecologies of place using geopoetics deep mapping and slow residency to propose broadly based collaborations in a form of disciplinary agnosticism Providing a radical alternative to current notions of interdisciplinarity this book demonstrates the breadth of new creative approaches and attitudes that now challenge assumptions of the solitary genius and a culture of possessive individualism Drawing upon a multiplicity of perspectives the book builds on a variety of differing creative approaches contrasting ways in which both visual art and the concept of the artist are shifting through engagement with ecologies of place Through examples of specific established practices in the UK Australia and the USA and other emergent practices from across the world it provides the reader with a rich illustration of the ways in which ensemble creative undertakings are reactivating art s relationship with place and transforming the role of the artist This book will be of interest to artists art educators environmental activists cultural geographers place based philosophers and postgraduate students and to all those concerned with the revival of place through creative work in the twenty first century

Huey P. Long Bridge Tonja Koob Marking,Jennifer Snape,2013 Named after the 40th governor of Louisiana the Huey P Long Bridge just outside of New Orleans in Jefferson Parish is the longest railroad bridge in the United States For 15 years after it opened in 1935 it was the longest railroad bridge in the world Initially conceived in 1892 the Huey P was the first bridge to span the deep draft navigation channel of the lower Mississippi River opening the path for a southern transcontinental railroad The highway and pedestrian portions of the bridge provided additional transport which previously had only been available by ferry New Orleans and its surrounding regions grew in population and economic importance as the publicly owned bridge connected the Port of New Orleans to the rest of the United States through six Class I railroads The Huey P continues to function in its original now undersized capacity In April 2006 the state began a widening of the bridge to double its automobile lanes from 18 feet to 43 feet In September 2012 the American Society of Civil Engineers dedicated the Huey P Long Bridge as a Historic Civil Engineering Landmark
