Stochastic Process Limits:

Stochastic-Process Limits Ward Whitt, 2006-04-11 Stochastic Process Limits are useful and interesting because they generate simple approximations for complicated stochastic processes and also help explain the statistical regularity associated with a macroscopic view of uncertainty This book emphasizes the continuous mapping approach to obtain new stochastic process limits from previously established stochastic process limits The continuous mapping approach is applied to obtain heavy traffic stochastic process limits for queueing models including the case in which there are unmatched jumps in the limit process These heavy traffic limits generate simple approximations for complicated queueing processes and they reveal the impact of variability upon queueing performance The book will be of interest to researchers and graduate students working in the areas of probability stochastic processes and operations research In addition this book won the 2003 Lanchester Prize for the best contribution to Operation Research and Management in English see <http://www.informs.org/Prizes/LanchesterPrize.html> *Stochastic-Process Limits* Ward Whitt, 2013-04-24 From the reviews The material is self contained but it is technical and a solid foundation in probability and queueing theory is beneficial to prospective readers It is intended to be accessible to those with less background This book is a must to researchers and graduate students interested in these areas ISI Short Book Reviews An Author and Permuted Title Index to Selected Statistical Journals Brian L. and without scaling Chapters four and five address branching random walks and the Bernoulli sieve respectively and their connection to the results of the previous chapters With many motivating examples this book appeals to both theoretical and applied probabilists **Quasi-Stationary Phenomena in Nonlinearly Perturbed Stochastic Systems** Mats

Gyllenberg,Dmitrii S. Silvestrov,2008-10-31 The book is devoted to studies of quasi stationary phenomena in nonlinearly perturbed stochastic systems New methods of asymptotic analysis for nonlinearly perturbed stochastic processes based on new types of asymptotic expansions for perturbed renewal equation and recurrence algorithms for construction of asymptotic expansions for Markov type processes with absorption are presented Asymptotic expansions are given in mixed ergodic for processes and large deviation theorems for absorption times for nonlinearly perturbed regenerative processes semi Markov processes and Markov chains Applications to analysis of quasi stationary phenomena in nonlinearly perturbed queueing systems population dynamics and epidemic models and for risk processes are presented The book also contains an extended bibliography of works in the area It is an essential reference for theoretical and applied researchers in the field of stochastic processes and their applications and may be also useful for doctoral and advanced undergraduate students Perturbed

Semi-Markov Type Processes I Dmitrii Silvestrov,2022-03-25 This book is the first volume of a two volume monograph devoted to the study of limit and ergodic theorems for regularly and singularly perturbed Markov chains semi Markov processes and multi alternating regenerative processes with semi Markov modulation The first volume presents necessary and sufficient conditions for weak convergence for first rare event times and convergence in the topology J for first rare event processes defined on regularly perturbed finite Markov chains and semi Markov processes The text introduces new asymptotic recurrent algorithms of phase space reduction It also addresses both effective conditions of weak convergence for distributions of hitting times as well as convergence of expectations of hitting times for regularly and singularly perturbed finite Markov chains and semi Markov processes The book also contains a comprehensive bibliography of major works in the field It provides an effective reference for both graduate students as well as theoretical and applied researchers studying stochastic processes and their applications **Quantitative Trading** Xin Guo,Tze Leung Lai,Howard Shek,Samuel Po-Shing
