Storied Land John Walton, 2003-12 John Walton never writes predictable books and Monterey California is not a predictable place the pairing is perfect Although rooted in Monterey this book explores how people in general construct historical narratives Storied Land is as thought provoking a discussion of public history and what it means to tell stories about the past as anything that I have read Richard White author of *Remembering Ahanagran A History of Stories* With deep research shrewd analysis and vivid writing John Walton reveals how we live in a web of competing stories that connect future and present to a contested past In recovering the particular riches of Monterey s literally storied past Walton finds universal experiences of labor resistance loss and silencing His own masterful storytelling lets us develop a fuller more humane tie to the people of our past Alan Taylor author of the Pulitzer Prize winning *William Cooper s Town Power and Persuasion on the Frontier of the Early American Republic* In the borderlands between archived event and public memory John Walton has found a pathway to understanding the process whereby a community remembers forgets denies affirms or otherwise structures or re structures its understanding of itself Excavating a region and a city important to Native American Spanish Mexican and American California *A Storied Land* makes a welcomed contribution to California studies and the larger history and sociology of place Kevin Starr author of *Inventing the Dream California Through the Progressive Era* Once again John Walton has turned the facts about California into a compelling narrative and a profound meditation on the nature of history and collective memory Howard Becker author of *Art Worlds*

How Cities Won the West Carl Abbott, 2011-03-03 Cities rather than individual pioneers have been the driving force in the settlement and economic development of the western half of North America Throughout the seventeenth eighteenth and nineteenth centuries western urban centers served as starting points for conquest and settlement As these frontier cities matured into metropolitan centers they grew from imitators of eastern culture and outposts of eastern capital into independent sources of economic cultural and intellectual change From the Gulf of Alaska to the Mississippi River and from the binational metropolis of San Diego Tijuana to the Prairie Province capitals of Canada Carl Abbott explores the complex urban history of western Canada and the United States The evolution of western cities from stations for exploration and military occupation to contemporary entry points for migration and components of a global economy reminds us that it is cities that won the West And today as cultural change increasingly moves from west to east Abbott argues that the urban West represents a new center from which emerging patterns of behavior and changing customs will help to shape North America in the twenty first century *Racial Beachhead* Carol Lynn McKibben, 2011-11-23 In 1917 Fort Ord was established in the tiny subdivision of Seaside California Over the course of the 20th century it held great national and military importance a major launching point for World War II operations the first base in the military to undergo complete integration the West Coast's most important training base for draftees in the Vietnam War a site of important civil rights movements until its closure in the 1990s Alongside it the city of Seaside took form Racial Beachhead offers the story of this city shaped over the decades by military policies of racial integration in the context of the ideals of the American civil rights movement Middle class blacks together with other military families black white Hispanic and Asian created a local politics of inclusion that continues to serve as a reminder that integration can work to change ideas about race Though Seaside's relationship with the military makes it unique at the same time the story of Seaside is part and parcel of the story of 20th century American town life Its story contributes to the growing history of cities of color those minority majority places that are increasingly the face of urban America **Commemoration and Bloody Sunday** B. Conway, 2010-03-03 In this wide

ranging study of the politics of memory in Northern Ireland Brian Conway examines the career of the commemoration of Bloody Sunday and looks at how and why the way this historic event is remembered has undergone change over time Drawing on original empirical data he provides new insights into the debate on collective memory Golden Dreams Kevin Starr,2011-09-09 A narrative tour de force that combines wide ranging scholarship with captivating prose Kevin Starr s acclaimed multi volume Americans and the California Dream is an unparalleled work of cultural history In this new volume Starr covers the crucial postwar period 1950 to 1963 when the California we know today first burst into prominence In a powerful blend of telling events colorful personalities and insightful analyses he brilliantly illuminates the dominant economic social and cultural forces in California in these pivotal years **Negotiating Boundaries in the City** Joanna Herbert,2016-04-22 Using in depth life story interviews and oral history archives this book explores the impact of South Asian migration from the 1950s onwards on both the local white British born population and the migrants themselves Taking Leicester as a main case study identified as a European model of multicultural success Negotiating Boundaries in the City offers a historically grounded analysis of the human experiences of migration Joanna Herbert shows how migration created challenges for both existing residents and newcomers for both male and female migrants and explores how they perceived and negotiated boundaries within the local contexts of their everyday lives She explores the personal and collective narratives of individuals who might not otherwise appear in the historical records highlighting the importance of subjective everyday experiences The stories provide valuable insights into the nature of white ethnicity inter ethnic relations and the gendered nature of experiences and offer rich data lacking in existing theoretical accounts This book provides a radically different story about multicultural Britain and reveals the nuances of modern urban experiences which are lost in prevailing discourses of multiculturalism
