Children & Family Stephen Gislason, 2016-05-06 Examines the intense interactions of parents and children From Dr G s preface Parents receive a lot of advice from many people Popular magazines and books offer a continuous stream of conflicting advice Professionals have a variety of opinions about child rearing that range from helpful suggestions to misleading and even bizarre ideas Child psychology is an eclectic assembly of ideas miscellaneous observations opinions fears and irrational beliefs Confusion prevails in education about what children should learn and how they should learn it Parents receive a lot of advice from many people Popular magazines and books offer a continuous stream of conflicting

advice If psychologists physicians and educators are confused what about parents The best parents are pragmatic and not theorists They stay involved with their children follow some basic guidelines they learned and tend to do whatever works Good parents improvise childcare with a combination of innate generosity common sense love and concessions to the demands of modern life In this book I develop a perspective based on understanding human nature The deep lineage for every human lies in the interaction of many layers of biological determinants The culture of parents schools and community impose a second lineage on a child that sets limits on the form and content of learning A family is any combination of adults and children that creates a home The essence of family is caring and nurturing We are social creatures Children are innately social but need to learn what we are doing these days The learning requirement is greater than ever before because we now depend on complicated technologies and must learn to interact with a great number of other humans who will be different from us in many ways To include more humans in the family of man as constructive peaceful contributors each child must receive loving care the right food sophisticated education opportunities for employment and the freedom to express his or her version of humanity Thoughtful well educated and affluent parents have the opportunity to understand their responsibilities to plan and allocate resources for an unborn child A good parent faces a continuous series of challenges and problems that need solution Parenting is not an easy job A realistic understanding of human nature will help parents to guide their children toward a successful adult life Telling the Story Geoff Mead,2014-03-13 How to master the art of narrative leadership Telling the Story shows how leaders affect our understanding of what is possible and desirable through the stories they tell It opens a door into the world of narrative leadership what stories are and how they work when to tell a story and how to tell one well and how the language and metaphors we use influence our actions and change how we think about the world Explains how narrative leadership shapes and defines what s possible on an organizational level Written by a renowned consultant on the art of narrative leadership Challenges leaders to consider how narrative can influence and help create the kind of society they envision Bridges to Science Fiction and Fantasy Gregory Benford,Gary Westfahl,Howard V.
