Stepping Twice Into The River

Richard E. Ferdig

Stepping Twice Into The River:

Stepping Twice Into the River Robert King, 2005 Robert King recounts his exploration of the almost unnoticeable along North Dakota's Sheyenne River from its headwaters to river's end. With every experience along the way tracing a military campaign, canoeing the river, visiting a ghost town, and even trying to sleep in an ancient Cheyenne village, King delves deeper into the river's culture. Each stop in his travels, each chapter of his writing brings to light a different aspect of the plains, focusing on Native American culture, pioneer society, religion, war, agriculture, and nature. In the hands of this gifted thinker and writer, local facts yield universal metaphor. An able guide, King illuminates the ordinary from the perspectives of history, science, and literature. Blending travel narrative, interesting details, and poetic reflection, *Stepping Twice Into the River* takes readers on a journey through time, revealing both stability and change and offering prairie wisdom. Readers will find in Robert King an affable and delightful guide, a painter of a vivid portrait of human endeavour on the northern plains.

Stepping in the Same River Twice Ayelet Shavit, Aaron M. Ellison, 2017-04-25 An international team of biologists, philosophers, and historians of science explores the critically important process of replication in biological and biomedical research. Without replication, the trustworthiness of scientific research remains in doubt. Although replication is increasingly recognized as a central problem in many scientific disciplines, repeating the same scientific observations of experiments or reproducing the same set of analyses from existing data is remarkably difficult. In this important volume, an international team of biologists, philosophers, and historians of science addresses challenges and solutions for valid replication of research in medicine, ecology, natural history, agriculture, physiology, and computer science. After the introduction to important concepts and historical background, the book offers paired chapters that provide theoretical overviews followed by detailed case studies. These studies range widely in topics from infectious diseases and environmental monitoring to museum collections, meta-analysis, bioinformatics, and more. The closing chapters explicate and quantify problems in the case studies, and the volume concludes with important recommendations for best practices.

The Blind Watch Jack E. Brush, 2021-01-10 The Blind Watch has a twofold purpose. Firstly, it aims to expose some of the salient inadequacies and fallacies of modern atheism. Secondly, and more fundamentally, it is intended to expand our thinking about nature in general and about the meaning of nature for a Christian understanding of human beings. For systematic reasons, the book focuses on Richard Dawkins' *The Blind Watchmaker*, which has become a classic on modern atheism. In contrast to Dawkins' work, the present book describes the watch, i.e., the atheistic scientist, not the watchmaker, as blind insofar as the scientist calculates everything but sees very little. By confronting the atheism of Dawkins with the philosophical Heraclitus and the Stoics and the theological traditions of the Apostle Paul and Augustine, the book develops a fundamental understanding of nature as nature that leads to a definition of life quite different from that of the evolutionary biologists.

Pseudo-retranslation Mehmet Yildiz, 2024-08-16 This book presents pseudo retranslations as a new phenomenon of translational intertextuality, revealing how pseudo retranslations

establish large networks of intertextuality across academic works how academic authors have recourse to this procedure as they create their academic texts and how pseudo retranslations contribute to the dissemination of translation distorted scholarly knowledge and lead to epistemically polluted academic ecosystems Pseudo retranslation can be defined as an academic author's partial or complete exploitation of another academic author's translation and presenting it as a retranslation of the source text This phenomenon first documented in Yildiz 2021 arises from academic authors failure to refer to or translate primary sources particularly in English Since there occurs no actual retranslation process this procedure is called pseudo retranslation Using a range of academic texts from the Turkish context as case studies the author presents the integral constituents of this phenomenon and the behavioural patterns of its renderers This book will be of particular interest to academics and postgraduates in the field of translation studies and corpus linguistics *Explaining the Cosmos* Daniel W. Graham, 2009-11-20 *Explaining the Cosmos* is a major reinterpretation of Greek scientific thought before Socrates Focusing on the scientific tradition of philosophy Daniel Graham argues that Presocratic philosophy is not a mere patchwork of different schools and styles of thought Rather there is a discernible and unified Ionian tradition that dominates Presocratic debates Graham rejects the common interpretation of the early Ionians as material monists and also the view of the later Ionians as desperately trying to save scientific philosophy from Parmenides criticisms In Graham's view Parmenides plays a constructive role in shaping the scientific debates of the fifth century BC Accordingly the history of Presocratic philosophy can be seen not as a series of dialectical failures but rather as a series of theoretical advances that led to empirical discoveries Indeed the Ionian tradition can be seen as the origin of the scientific conception of the world that we still hold today Society, Culture, and Technology: Ten Lessons for Educators, Developers, and Digital Scientists Richard E. Ferdig, 2018-04-26 This book provides ten important lessons for educators developers and digital scientists who are interested in the relationship between society culture and technology The text provides an discussion of current and past research with the goal of introducing direct implications for practice Toward a Process Approach in Psychology Paul van Geert, Naomi de Ruiter, 2022-07-28 Psychological science constructs much of the knowledge that we consume in our everyday lives This book is a systematic analysis of this process and of the nature of the knowledge it produces The authors show how mainstream scientific activity treats psychological properties as being fundamentally stable universal and isolable They then challenge this status quo by inviting readers to recognize that dynamics context specificity interconnectedness and uncertainty are a natural and exciting part of human psychology these are not things to be avoided and feared but instead embraced This requires a shift toward a process based approach that recognizes the situated time dependent and fundamentally processual nature of psychological phenomena With complex dynamic systems as a framework this book sketches out how we might move toward a process based praxis that is more suitable and effective for understanding human functioning Philosophical Tales Martin Cohen, 2009-01-21 Enlightening and entertaining *Philosophical Tales* examines a

few of the fascinating biographical details of history's greatest philosophers, alas mostly men, and highlights their contributions to the field. By applying the true philosophical approach to philosophy itself, the text provides us with a refreshing alternative history of philosophy. Opens up new philosophical debate by applying the true philosophical approach to philosophy itself. Provides summaries of the most celebrated and philosophically interesting tales, their backgrounds, and assessments of the leading players. Explores philosophers and schools of thought in one key philosophical text to supply a solid grounding in philosophical ideas and individuals. Shakes some of the foundations of philosophy with the aim of encouraging the reinvigoration of philosophy itself.

About Time Mark Currie, 2010-10-12 Why have theorists approached narrative primarily as a form of retrospect? Mark Currie argues that anticipation and other forms of projection into the future are vital for an understanding of narrative and its effects in the world.

The Political Thought of Plato and Aristotle Sir Ernest Barker, 1906

Things in Heaven and Earth Merritt Abrash, 2008-04-02 The *Clouds That Follow* is the memoir of a young boy growing up into adulthood in Maine. As the title suggests, this young boy has his share of problems: an abusive, cheating, alcoholic father; a mother who enabled the abuser and actually engaged in bloody conflict with that man. The little boy suffered loss of self-esteem and confidence brought on by his tyrannical father until he couldn't take it anymore. Unable to function in school, being called lazy by abusive teachers, brought this little 12-year-old boy to the end of his proverbial rope and ultimately led him to perform despicable acts of self-mutilation in order to get a day or two of peace. If only things got better from there, but that was not the case. A pervert took advantage of my abuse and abused me. I made it through high school, met a girl, and married. Things were looking better until I nearly bled to death from colitis at the age of 26 and had to have that operation. The rest of my memoir, which concludes when I am 49 years old, is equally incredible. The book is full of wry humor and much nostalgia. An easy read, yes, and a very, very powerful story.

After Whitehead Michel Weber, 2013-05-02 When Rescher's *Process Metaphysics* 1996 was published, it was widely acclaimed as a major step towards the academic recognition of a mode of thought that has otherwise been confined within sharp scholarly boundaries. Of course, it is not an easy book; despite its stylistic clarity, it remains the complex outcome of a life's work in most areas of philosophy. The goal of the present volume is to systematically unfold the vices and virtues of *Process Metaphysics* and thereby to specify the contemporary state of affairs in process thought. To do so, the editor has gathered one focused contribution per chapter, each paper addressing specifically and explicitly its assigned chapter and seeking to promote a dialogue with Rescher. In addition, the volume features Rescher's replies to the papers.

effects of personality and characters whose personhood is suspended the incisive rendering of psychology and desire produced by externalizations of consciousness Certain first person texts highlight the constitutive tension between the functions of narrator and character joined in that first person while in third person texts a charismatic or impervious central voice can be shown nevertheless to hold the psychologies it empties from the characters it describes At stake is the particular way that modernist narrative responds to the question of literature's capacities for addressing psychic life In Virginia Woolf's *Jacob's Room* William Faulkner's *As I Lay Dying* Ford Madox Ford's *The Good Soldier* Eudora Welty's *The Golden Apples* Ronald Firbank's *Concerning the Eccentricities of Cardinal Pirelli* and James Purdy's *Mourners Below* this volume finds a paradoxical merger a humanizing effect achieved by narrative depersonalization and its evocations of psychology and desire
