cases are emerging from which immense lessons can be drawn This book assembles a collection of research papers based on studies completed in 2008 and 2009 in Southern Africa that examine various dimensions of the institutional constraints small farmers are facing in the region and how they are going about dealing with them The papers draw from these diverse and polar experiences and present some theoretical and practical insights that should form the basis for more in depth country level sector specific analyses focusing mainly on citrus horticultures cotton and livestock The thematic issues of income inequality land reform natural resource management and value chain governance and chain choice are covered in this book and are expected to be of interest for a wide constituency including researchers development practitioners rural animators and policy makers *Small Farmer Development in Asia and the Pacific* N.
