Building Engines for War Edward M. Young, 2023-11-13 Dive into the heart of wartime innovation and manufacturing through this groundbreaking book, unveiling a riveting narrative of technological mastery and organizational ingenuity. This meticulously researched work challenges conventional views of wartime production, offering a fresh perspective on the incredible efforts that drove the Allies to victory. Young's insightful analyses illuminate the strategic collaboration between the aerospace and automotive industries, showcasing their collective adaptation that created the engines powering victory. Spanning continents, Young examines the transformation of aircraft engine manufacturing during World War II. Unearthing the operations of key players such as the Bristol Aeroplane Company and Pratt & Whitney, it is a critical foundation for understanding the dynamics of wartime production that continue to influence our world today. Edward Young's reconstruction and analysis of the Allies' massive World War II aircraft engine programs is priceless, unique, thorough, and critical, all at once. Philip Scranton, Professor Emeritus, History of Industry and Technology, Rutgers University. ISBN 9781468606645 ISBN 9781468606652 ISBN 9781468606669 DOI 10.4271/9781468606652 *Integration of Cultural Considerations in European Union Law and Policies* Evangelia Psychogiopoulou, 2008 Drawing on a series of EC policy areas that possess a cultural component, this book offers an encompassing and in-depth analysis of the integration of cultural considerations in EC law and action, assessing the impact of Article 151(4) EC in the process.

Publishers' circular and booksellers' record, 1896 *Publishers' Circular and Booksellers' Record of British and Foreign Literature*, 1895 **Catalogue of the Lending Department of the Library of the Corporation of the City of London** Corporation of London. Library, 1911 *Assembling cultures* Jack Saunders, 2019-05-10 In British political discourse, the idea that in the 1970s trade unions ran the country has become a truism, a folk mythology invoked against the twin perils of socialism and strikes. But who exactly wielded power in Britain's workplaces, and on what terms? *Assembling cultures* takes a fine-grained look at factory activism in the motor industry between 1945 and 1982, using car manufacturing as a key case for unpicking important narratives around affluence, declinism, and class. It traces the development of the militant car worker stereotype and looks at the real social relations that lay behind

car manufacturing's reputation for conflict. In doing so, this book reveals a changing complex world of social practices, cultural norms, and shared values and expectations. From relatively meagre interwar trade union traditions during the post-war period, car workers developed shop floor organisations of considerable authority, enabling some to make new demands of their working lives but constraining others in their more radical political aims. *Assembling Cultures* documents in detail a historic process where, from the 1950s, groups and individuals set about creating and reproducing collective power and asks what that meant for their lives. This is a story of workers and their place in the power relations of post-war Britain. This book will be invaluable to lecturers and students studying the history, sociology, and politics of post-war Britain, particularly those with an interest in power, rationality, class, labour, gender, and race. The detailed analysis of just how solidarity, organisation, and collective action were generated will also prove useful to trade union activists.

Forging Modernity Martin

Hutchinson, 2023-03-30. The Industrial Revolution provided the greatest increase in living standards the world has ever known while propelling Britain to dominance on the global stage. In *Forging Modernity*, Martin Hutchinson looks at how and why Britain gained this prize ahead of its European competitors. After comparing their endowments and political structures as far back as 1600, he then traces how Britain, through better policies primarily from the political Tory party, diverged from other European countries. Hutchinson's Harvard MBA allows a unique perspective on the early industrial enterprises; many successes resulted from marketing, control systems, and logistics rather than from production technology alone. While on a national scale, the scientific method and commercial competition were as important as physical infrastructure. By 1830, through ever-improving policies, Britain had built a staggering industrial lead, half a century ahead of its rivals. Then the Tories lost power and policy changed forever. In his conclusion, Hutchinson shows how changes welcomed by conventional historians caused the decline of Industrial Britain. Nevertheless, the policies that drove growth, ingenuity, and rising living standards are still available for those bold enough to adopt them.
