The Open Circle The Theater Environment Of Peter Brook:

The Open Circle Andrew Todd, Jean-Guy Lecat, 2003 Peter Brook is perhaps contemporary theatre's greatest inventor and is one of the most influential directors that Britain has ever produced Here Brook describe the gestation and completion of his many works through the spaces they occupied all over the world Geometry and Atmosphere C. Alan Short, Peter Barrett, Alistair Fair, Monty Sutrisna, 2016-12-05 Drawing on detailed design construction and financial histories of six prominent Performing Arts buildings with budgets ranging from 3.4 million to over 100 million *Geometry and Atmosphere* presents unique and valuable insights into the complex process of building for the arts Each theatre project from tailor made spaces for avant garde companies to iconic and innovative receiving houses yields surprising and counter intuitive findings For each of the six projects the authors have interviewed all those involved Combining these interviews with exhaustive archival research the authors then provide cross case analysis which is distilled into guidance for all stakeholders as they transform their initial vision into built reality In particular the book challenges the technical focus of existing design guides for the Performing Arts by suggesting that current practice in briefing and design does not serve the Arts community especially well It shows that there is a need for an approach in which the focus is firmly rooted in the delivery of the driving artistic vision As well as being of interest to architects urban designers and those involved in theatre studies this book will be useful to other sectors where public money is spent on major building projects **Setting the Scene** Alistair Fair, 2016-03-03 During the twentieth century an increasingly diverse range of buildings and spaces was used for theatre Theatre architecture was re formed by new approaches to staging and performance while theatre was often thought to have a reforming role in society Innovation was accompanied by the revival and reinterpretation of older ideas The contributors to this volume explore these ideas in a variety of contexts from detailed discussions of key architects work including Denys Lasdun Peter Moro Cedric Price and Heinrich Tessenow to broader surveys of theatre in West Germany and Japan Other contributions examine the Malm Stadsteater ideal theatres in post war North America found space in 1960s New York and Postmodernity in 1980s East Germany Together these essays shed new light on this complex building type and also contribute to the wider architectural history of the twentieth century Theatre and Performance Design Jane Collins, Andrew Nisbet, 2012-10-02 *Theatre and Performance Design* A Reader in Scenography is an essential resource for those interested in the visual composition of performance and related scenographic practices Theatre and performance studies cultural theory fine art philosophy and the social sciences are brought together in one volume to examine the principle forces that inform understanding of theatre and performance design The volume is organised thematically in five sections looking the experience of seeing space and place the designer the scenographic bodies in space making meaning This major collection of key writings provides a much needed critical and contextual framework for the analysis of theatre and performance design By locating this study within the broader field of scenography the term increasingly used to describe

a more integrated reading of performance this unique anthology recognises the role played by all the elements of production in the creation of meaning Contributors include Josef Svoboda Richard Foreman Roland Barthes Oscar Schlemmer Maurice Merleau Ponty Richard Schechner Jonathan Crary Elizabeth Wilson Henri Lefebvre Adolph Appia and Herbert Blau

The Embodied Image Juhani Pallasmaa, 2011-05-16 *The Embodied Image* The Embodied Image Imagination and Imagery in Architecture Juhani Pallasmaa All artistic and architectural effects are evoked mediated and experienced through poeticised images These images are embodied and lived experiences that take place in the flesh of the world becoming part of us at the same time that we unconsciously project aspects of ourselves on to a conceived space object or event Artistic images have a life and reality of their own and they develop through unexpected associations rather than rational and causal logic Images are usually thought of as retinal pictures but profound poetic images are multi sensory and they address us in an embodied and emotive manner Architecture is usually analysed and taught as a discipline that articulates space and geometry but the mental impact of architecture arises significantly from its image quality that integrates the various aspects and dimensions of experience into a singular internalised and remembered entity The material reality is fused with our mental and imaginative realm The book is organised into five main parts that look at in turn the image in contemporary culture language thought and the image the many faces of the image the poetic image and finally the architectural image *The Embodied Image* is illustrated with over sixty images in pairs which are diverse in subject They range from scientific images to historic artistic and architectural masterpieces Artworks span Michelangelo and Vermeer to Gordon Matta Clark and architecture takes in Modern Masters such as Mies van der Rohe Le Corbusier and Alvar Aalto as well as significant contemporary works by Steven Holl and Daniel Libeskind

Theatre Spaces 1920-2020 Iain Mackintosh, 2023-03-09 In this lavishly illustrated hands on account of the creation of new theatre spaces spanning a century Iain Mackintosh offers a compelling history that is part memoir part impassioned call to rethink the design of our theatre spaces and the future of live theatre As the originator of theatre designs as diverse as the Cottesloe in 1977 Glyndebourne in 1994 the Orange Tree Theatre in 1991 the Martha Cohen Theatre in 1985 and the Tina Packer Playhouse in 2001 he discovered why the same show worked in some theatres but not in others It is this unique blend of experience that informs this account of many of the best known theatre spaces in Britain besides many international examples including the Guthrie Theater Minneapolis and the Oslo Opera House Running throughout is a consideration of factors which have shaped design thinking during this time and which demand attention today After the long theatre closures driven by the Covid 19 pandemic Mackintosh argues that now is the time to discover the routes travelled over the last century Published in partnership with the Society of Theatre Research the book features a foreword by Sir Richard Eyre Director of the National Theatre 1987 1997
