The Origin Of British Field Systems An Interpretation

John Langdon

The Origin Of British Field Systems An Interpretation:

The Origin of British Field Systems Robert A. Dodgshon, 1980 *Field Systems and Farming Systems in Late Medieval England* Bruce M.S. Campbell, 2023-05-31 The later Middle Ages was an overwhelmingly rural world with probably three out of four households reliant upon farming for a living Yet conventional accounts of the period rarely do justice to the variety of ways in which the land was managed and worked The thirteen essays collected in this volume draw upon the abundant documentary evidence of the period to explore that diversity In the process they engage with the issue of classification without which effective generalisation is impossible and offer a series of solutions to that particularly thorny methodological challenge Only through systematic and objective classification is it possible to differentiate between and map different field systems husbandry types and land use categories That in turn makes it possible to consider and evaluate the relative roles of soils and topography institutional structures and commercialised market demand in shaping farm enterprise both during the period of mounting population before the Black Death and the long era of demographic decline that followed it What emerges is an agrarian world more commercialised differentiated and complex than is usually appreciated whose institutional and agronomic contours shaped the course of agricultural development for centuries to come *Studies of Field Systems in the British Isles* Alan R. H. Baker, 1973-07-19 An enormous amount of research into British field systems has been undertaken by historical geographers economic historians and others since H L Gray s classic work on English Field Systems was published This book both synthesizes and advances our knowledge of field systems in the British Isles

Interpreting the Landscape Michael Aston, 2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain s landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved **The Village & House in the Middle Ages** Jean Chapelot, Robert Fossier, 1985-01-01

Horses, Oxen and Technological Innovation John Langdon, 2002-07-04 An account of the introduction of the horse as a replacement for oxen in English farming **King Arthur** N. J. Higham, 2005-07-05 Unlike other titles on King Arthur our book takes a serious look at the legend rather than just an appreciative one Looks closely at the role that Arthur played Discusses why King Arthur s myth is so important Well illustrated with maps and photos of suspected Arthurian sites

Vassals, Heiresses, Crusaders, and Thugs Hugh M. Thomas, 2016-11-11 In recent decades works of the gentry have revolutionized our understanding of late medieval and early modern England In *Vassals Heiresses Crusaders and Thugs* Hugh M Thomas takes the study of the gentry back to the period 1154-1216 His conclusions not only

reveal remarkable similarities between the gentry of various periods but also shed light on the massive changes that transformed England in the Angevin Period

Enclosure Gary Fields, 2017-09-05 Enclosure marshals bold new arguments about the nature of the conflict in Israel Palestine Gary Fields examines the dispossession of Palestinians from their land and Israel's rationale for seizing control of Palestinian land in the contexts of a broad historical analysis of power and space and of an enduring discourse about land improvement Focusing on the English enclosures which eradicated access to common land across the English countryside Amerindian dispossession in colonial America and Palestinian land loss Fields shows how exclusionary landscapes have emerged across time and geography Evidence that the same moral legal and cartographic arguments were used by enclosers of land in very different historical environments challenges Israel's current claim that it is uniquely beleaguered This comparative framework also helps readers in the United States and the United Kingdom understand the Israeli Palestinian conflict in the context of their own histories

Agriculture and Rural Society After the Black Death Ben Dodds, Richard Britnell, 2009-04 With special emphasis on the period following the Black Death this new collection of essays explores agriculture and rural society during the late Middle Ages Combining a broad perspective on agrarian problems such as depopulation and social conflict with illustrative material from detailed local and regional research this compilation demonstrates how these general problems were solved within specific contexts The contributors supply detailed studies relating to the use of the land the movement of prices the distribution of property the organization of trade and the cohesion of village society among other issues New research on regional development in medieval England and other European countries is also discussed
