Abstract

Creative workers strive to achieve success and influence by producing original output. In this paper we define and measure originality and influence, based on a new model of style. We apply the methodology to Western classical music composed since the 15th century, and test it using extensive data on the content of musical compositions, popular success, and biographical information. We find that more original composers tend to be more influential upon the work of their later peers and more successful with present-day audiences. A positive association between originality and influence also holds across works by a given composer.

An eminent artist will bring about a considerable change in the established modes of each of those arts, and introduce a new fashion of writing, music, or architecture.— Adam Smith (1759)

1 Introduction

Many scientists, entrepreneurs or artists are driven by the desire to be original, influential or successful. But little is known about how these variables interact. Adam Smith was the first economist to approach these topics, but since then few others have ventured into related inquiries, perhaps because originality is such an
