The Origins Of Agnosticism Victorian Unbelief And The Limits Of Knowledge

Robin Le Poidevin

The Origins Of Agnosticism Victorian Unbelief And The Limits Of Knowledge:

The Origins of Agnosticism Bernard Lightman, 2019-12-01 Originally published in 1987 *The Origins of Agnosticism* provides a reinterpretation of agnosticism and its relationship to science Professor Lightman examines the epistemological basis of agnostics learned ignorance studying their core claim that God is unknowable To address this question he reconstructs the theory of knowledge posited by Thomas Henry Huxley and his network of agnostics In doing so Lightman argues that agnosticism was constructed on an epistemological foundation laid by Christian thought In addition to undermining the continuity in the intellectual history of religious thought Lightman exposes the religious origins of agnosticism

The Origins of Agnosticism Bernard V. Lightman, 1987-01-01 **The Origins of Agnosticism** Bernard V. Lightman, 2019 *Agnosticism: A Very Short Introduction* Robin Le Poidevin, 2010-10-28 In this *Very Short Introduction* Robin Le Poidevin sets the philosophical case for agnosticism and explores it as a historical and cultural phenomenon He challenges the common wisdom about agnosticism among both believers and atheists and invites the reader to rethink their own position on the issues This stimulating and provocative guide takes issue on many points with the assertions of prominent atheists such as Richard Dawkins

Science and Spirituality David Knight, 2023-04-14 Until the end of the eighteenth century almost everyone believed that the empirical world of science could produce evidence for a wise and loving God By the twenty first century this comforting certainty has almost vanished What caused such a cataclysmic change in attitudes to science and to the world *Science and Spirituality* offers a new history of the interaction between Western science and faith which explores their volatile connection and challenges the myth of their being locked in inevitable conflict Journeying from the French Revolution to the present day and taking in such figures as Francis Bacon Ren Descartes Charles Darwin Immanuel Kant Albert Einstein Mary Shelley and Stephen Hawking David Knight shows how science evolved from medieval and Renaissance forms of natural theology into the empirical discipline we know today Focusing on the overthrow of Church and State in revolutionary France and on the crucial nineteenth century period when a newly emerging scientific community rendered science culturally accessible *Science and Spirituality* shows how scientific disenchantment has provided some of our most flexible and powerful metaphors for God such as the hidden puppet master and the blind watchmaker and illustrates how questions of moral and spiritual value continue to intervene in scientific endeavour

Victorian Science in Context Bernard Lightman, 2008-07-31 Victorians were fascinated by the flood of strange new worlds that science was opening to them Exotic plants and animals poured into London from all corners of the Empire while revolutionary theories such as the radical idea that humans might be descended from apes drew crowds to heated debates Men and women of all social classes avidly collected scientific specimens for display in their homes and devoured literature about science and its practitioners *Victorian Science in Context* captures the essence of this fascination charting the many ways in which science influenced and was influenced by the larger Victorian culture Contributions from leading scholars in history literature and

the history of science explore questions such as What did science mean to the Victorians For whom was Victorian science written What ideological messages did it convey The contributors show how practical concerns interacted with contextual issues to mold Victorian science which in turn shaped much of the relationship between modern science and culture *The Unknowable* W. J. Mander,2020-05-18 W J Mander presents a history of metaphysics in nineteenth century Britain The story focuses on the elaboration of and differing reactions to the concept of the unknowable or unconditioned first developed by Sir William Hamilton in the 1829 The idea of an ultimate but unknowable way that things really are in themselves may be seen as supplying a narrative arc that runs right through the metaphysical systems of the period in question These thought schemes may be divided into three broad groups which were roughly consecutive in their emergence but also overlapping as they continued to develop In the first instance there were the doctrines of the agnostics who developed further Hamilton's basic idea that fundamental reality lies for the great part beyond our cognitive reach These philosophies were followed immediately by those of the empiricists and in the last third of the century the idealists both of these schools of thought albeit in profoundly different ways reacted against the epistemic pessimism of the agnostics Mander offers close textual readings of the main contributions to First Philosophy made by the key philosophers of the period such as Hamilton Mansel Spencer Mill and Bradley as well as some less well known figures such as Bain Clifford Shadworth Hodgson Ferrier and John Grote By presenting interpreting criticising and connecting together their various contrasting ideas this book explains how the three traditions developed and interacted with one another to comprise the history of metaphysics in Victorian Britain *Of Apes and Ancestors* Ian Hesketh,2009-10-03 Tell me sir is it on your grandmother's or your grandfather's side that you are descended from an ape In June of 1860 some of Britain's most influential scientific and religious authorities gathered in Oxford to hear a heated debate on the merits of Charles Darwin's recently published *Origin of Species* The Bishop of Oxford Soapy Samuel Wilberforce clashed swords with Darwin's most outspoken supporter Thomas Henry Huxley The latter's triumph amid quips about apes and ancestry has become a mythologized event symbolizing the supposed war between science and Christianity But did the debate really happen in this way *Of Apes and Ancestors* argues that this one dimensional interpretation was constructed and disseminated by Darwin's supporters becoming an imagined victory in the struggle to overcome Anglican dogmatism By reconstructing the Oxford debate and carefully considering the individual perspectives of the main participants Ian Hesketh argues that personal jealousies and professional agendas played a formative role in shaping the response to Darwin's hypothesis with religious anxieties overlapping with a whole host of other cultural and scientific considerations An absorbing study *Of Apes and Ancestors* sheds light on the origins of a debate that continues unresolved to this day *The Routledge Research Companion to Nineteenth-Century British Literature and Science* John Holmes,Sharon Ruston,2017-05-18 Tracing the continuities and trends in the complex relationship between literature and science in the long nineteenth century this companion provides scholars with a comprehensive authoritative and up to date

foundation for research in this field In intellectual material and social terms the transformation undergone by Western culture over the period was unprecedented Many of these changes were grounded in the growth of science Yet science was not a cultural monolith then any more than it is now and its development was shaped by competing world views To cover the full range of literary engagements with science in the nineteenth century this companion consists of twenty seven chapters by experts in the field which explore crucial social and intellectual contexts for the interactions between literature and science how science affected different genres of writing and the importance of individual scientific disciplines and concepts within literary culture Each chapter has its own extensive bibliography The volume as a whole is rounded out with a synoptic introduction by the editors and an afterword by the eminent historian of nineteenth century science Bernard Lightman

The Scientific Method Henry M. Cowles, 2020-04-14 The scientific method is just over a hundred years old From debates about the evolution of the human mind to the rise of instrumental reasoning Henry M Cowles shows how the idea of a single scientific method emerged from a turn inward by psychologists that produced powerful epistemological and historical effects that are still with us today
