

The Origins of Chinese Civilization

Geography of China

- Geography and climate divide China into two parts: north and south
- Core of China is a square region (1000 x 1000 miles) within distinct natural borders.
- Developed in even greater isolation than other ancient civilization like Egypt, Mesopotamia, and India
 - o Tendency toward isolationism in Chinese history develops, so that Chinese tended to see themselves as the center of the world.

Origins of Chinese History

- Agricultural revolution (domestication of rice): ca. 8000 BCE
- Hard to separate fact from legend.
- Archaeological evidence
 - o By 2000 BCE, the Longshan culture (along the Yellow River) was constructing walled settlements, casting bronze, making pottery, and using early version of Chinese script.
 - o Chinese legend attributes many of these innovations to five ancient sage emperors.

Shang Period (1750 – 1040 BCE)

 - o Each with different answers to the questions of the nature of the worlds, ...

Confucius and his Teaching

- Kong fu zi ("Great master Kong"): 551 – 469 BCE
- Primary philosophy of China (and the rest of East Asia) for almost 2500 years. Emphasis on ethical leadership, personal moral behavior, and acceptance of proper place in society.
- Believed in restoring moral purity and virtue in society (especially in leaders) that supposedly existed in the "Golden Age" of the Zhou dynasty.
- Revolutionary redefinition of "gentleman" not based on birth but learning and character.
- Confucian virtues:

The Origins of Chinese Civilization David N. Keightley, 1983-01-01 **The Origins of Chinese Civilization** David N. Keightley, 1983 **The Origins of Chinese Civilization**, 1978 **The Origins of Chinese Civilization** Hui

Wang, 2025-09-12 *Origins of Chinese Civilization* A History of China by Hui Wang takes you on a journey through China's ancient past told in a way that feels like you're listening to an elder recounting myths around a campfire. The book starts with Fuxi, the first leader whose inventions like the Eight Trigrams and fishing nets shaped early Chinese culture. The story moves through key figures like Nüwa who patched the sky and shaped humanity from clay and the Yan Emperor who pioneered agriculture and medicine. Finally, the legendary Yellow Emperor known as a creator of civilization brings the narrative into a more organized and developed era. The legends are filled with fascinating myths like Fuxi's miraculous birth from a footprint or Nüwa molding people from earth and the rise of agriculture through Emperor Yan's curiosity about plants. The author doesn't simply recite the historical figures but adds warmth, humor, and a sense of connection, making it easy to see why these stories have endured for thousands of years. It's not just about dates and events; it's about people trying to live better, inventing things that changed their daily lives, and facing challenges with creativity and resilience. This book is perfect for those who want to explore Chinese history not through dry facts but with lively storytelling that brings ancient China to life.

A History of Chinese Civilization Jacques Gernet, 1996-05-31 When published in 1982, this translation of Professor Jacques Gernet's masterly survey of the history and culture of China was immediately welcomed by critics and readers. This revised and updated edition makes it more useful for students and for the general reader concerned with the broad sweep of China's past. *The Origins of Chinese Civilization* David N. Keightley, 2023-11-15 The seventeen contributors to this interdisciplinary volume bring to the study of early China the analytical concerns of archaeology, art history, botany, climatology, cultural and physical anthropology, ethnography, epigraphy, linguistics, metallurgy, and political and social history. Readers interested in such topics as the origin of rice or millet, agriculture, the origin of writing, the nature of the tribe and the processes of state formation will find much value here. They will find too major hypotheses about the cultural importance of ecogeographical zones in China, Neolithic interaction between the east coast and Central Plains, the remarkable homogeneity of early Chinese crania, and the links between the Hsia, Shang, and Chou dynasties. Relying on recently published archaeological evidence and the insights gained from carbon 14 and thermoluminescent datings, the authors provide original and significant interpretations of the nature of Chinese civilization in its formative stage and the processes by which civilizations form. Since there is little doubt that the complex of culture traits which defines Chinese civilization in the second and first millennia B.C. developed from a Chinese Neolithic stage, the origin of the Chinese civilization is worth studying not only in its own right but as an instance of the indigenous development of civilizations in general. This volume will appeal to all who are interested in the genesis of civilization and the transition from the Neolithic to the Bronze Age; it summarizes that

state of present knowledge about China and suggests research strategies and hypotheses for the future Contributors Noel Barnard K C Chang Te Tzu Chang Cheung Kwong Yue Wayne H Fogg Ursula Martius Franklin Morton H Fried W W Howells Louisa G Fitzgerald Huber Karl Jettmar David N Keightley Fang Kuei Li Hui Lin Li William Meacham Richard Pearson E G Pulleyblank Robert Orr Whyte This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1983 The Making of the Chinese Civilization Jianye

A Mythological Approach to Exploring the Origins of Chinese Civilization Shuxian Ye, 2022-08-26

Is the lion the symbol of China? Or should it be the dragon or the phoenix? This book makes a provocative interpretation of the Chinese ancient totems such as the bear and the owl. Taking a mythological approach, it explores the origin of Chinese civilization using the quadruple evidence method, which integrates ancient and unearthed literature, oral transmission, and archeological objects and graphs. It testifies to the authenticity of unresolved ancient myths and legends from the origins of Chinese Jade Ware (6200 BC - 5400 BC) to the names of the Yellow Emperor (2698 - 2598 BC) and the legends from the Xia (2010 BC - 1600 BC), Shang (1600 BC - 1046 BC), Zhou (1046 BC - 771 BC), and Qin (221 BC - 206 BC) Dynasties. The book lays the foundation for a reconstruction of Chinese Mythistory. With well over 200 photographs of historic artifacts, the book appeals to both researchers and general readers.
