The One And The Many Teilhard De Chardins Vision Of Unity:

The One and the Many Donald P. Gray, 1969 **The One in the Many** Joseph A. Bracken, 2001 Classical notions of truth and objectivity have steadily eroded in the face of postmodernism Meeting this challenge head on Joseph Bracken here reconstructs the metaphysical tradition of the West on solid new foundations Drawing on the thought of Alfred North Whitehead Ervin Laszlo and Jürgen Habermas Bracken presents a new philosophical perspective that roots the relationship between God and the world in community Bracken first answers objections to the possibility of developing a new metaphysics in our postmodern age He then lays out the vertical and horizontal dimensions of his new metaphysical scheme a constructive perspective that results in a consciously communitarian understanding of the God world relationship The uniqueness of Bracken's position is its advocacy of a strictly social ontology in which the classical relationship of the One and the Many is reversed not the transcendence of the One over the Many but its emergence out of the Many in dynamic relationship Teilhard De Chardin and Eastern Religions U. M. King, 1977 *Teilhard de Chardin and Eastern Religions* Ursula King, 2011 Teilhard de Chardin and Eastern Religions is in part an update of the 1980 classic *Toward a New Mysticism* Author Ursula King has extensively revised this work adding new material as she traces Teilhard's encounter with Eastern thought It includes an extensive bibliography and annotated study guide Book jacket *Teilhard de Chardin* David Grumett, 2005 Pierre Teilhard de Chardin 1881-1955 has been regarded for too long as an esoteric thinker who evacuates theology by subjecting it to scientific theory There is an urgent need to reclaim him as a French catholic theologian with intellectual roots in the early twentieth century Teilhard's imaginative and inspiring work is grounded in the constructive use of biblical and patristic motifs and in his own life experiences of war exile and scientific endeavour From these he develops a distinctive philosophical theology which combines elements frequently assigned to the separate domains of philosophy of religion systematic theology and mysticism Teilhard provides a detailed theology of human embodiment and natural substances whilst his theories of human action passion vision and virtue offer suggestive resources to pastoral theology His evolutionary cosmology and social democratic politics are discussed in their historical context and the significance of his work for the ongoing dialogue between science and religion is assessed *The Unbearable Wholeness of Being* Ilia Delio, 2013 A quantum leap in our understanding of the universe one that reveals the whole consciousness that is active in every part and how every part participates in the whole The award winning author of *Christ in Evolution* and *The Emergent Christ* breaks new ground with this capstone in a trilogy that opens our eyes to the everywhere active all powerful all intelligent Love that guides and directs our new awareness of interrelatedness and interbeing She writes We all have a part to play in this unfolding Love we are wholes within wholes persons within persons religions within religions We are one body and we seek one mind and heart so that the whole may become more whole more personal and unified in love This is our Christian vocation to live in the Christ who is rising up from the ashes of death to become for us the God of the future

God and the Natural World Ted Peters, Marie Turner, 2020-05-01 This collection of essays is a fitting tribute to Denis Edwards who was one of Australia's leading theologians. In exploring the most challenging questions of our time these essays canvas some of the great themes of Christian theology that were the focus of Edwards' research. Denis Edwards was a theologian of dialogue: dialogue with our rich theological tradition, dialogue with science, dialogue with contemporary theologians. The contributors to this volume enter into a dialogue with substantial parts of the theological output of Denis Edwards. In the process they capture something of his humanity, his love of creation and his concern for our common home. The book demonstrates the commitment Denis Edwards had to a theology that is truly ecumenical and always learning from the insights of others. The editors and authors have done a great service in helping many others to deepen reflection on Denis Edwards' contribution to our understanding of God and the natural world.

Teilhard's Proposition for Peace Jean Maalouf, 2018-11-15 Teilhard de Chardin called the greatest prophet of this age intended to write a book called *The Book of Peace* though he failed to do so. Instead he went on sowing the seeds of peace throughout his writings. This book distills and presents the essence of the case Teilhard made for the cause of peace. There is no doubt that Teilhard's readers have noticed how difficult his thought can be and how puzzling it appears at times. This volume navigates the complexity of those labyrinthine roads, inviting the reader to confidently see the basic unity which underlies all that is. When we recognize that we live in the Divine Milieu where we witness the transforming presence of the divine in human consciousness we will existentially realize the truth of the principle by which Teilhard wanted us to live.

The Way of the Beloved Robert Arsdale, Diana Van Arsdale, 2016-11-18 The foundation of the Way of the Beloved is discovered in the heart of love itself where there lives and moves a will to exaltation of the other. To truly love another is to will the spiritual ideal upon that beloved one. When there is a mutual intention to exalt, infusing the daily life of a man and woman, they enter into the Way of the Beloved. This handbook is an attempt to put into book form what authors Robert and Diana Van Arsdale have been teaching to small groups of couples since 1976. Their workshops offer an ageless set of protocols for the transformation of the love relationship between a woman and a man into a path of spiritual development. Here they present an integrated body of progressive experiential exercises and meditations that were taught originally taught by Herman Rednick. Simply stated, *The Way of the Beloved* teaches a couple how to actualize the potential of their relationship through the intensification of love and compassion. Designed for couples in search of spiritual and emotional exploration, this guide offers methods intended to help them realize a vision of love fulfilled.

Sacred Sustainability, Polyhedral Christianity and Cosmic Challenges Jojo M. Fung, 2025-03-31 This book explores the concept of Polyhedral Christianity that has the capacity to embrace the inter-multicultural religious complexities of our contemporary world, taking inspiration from Pope Francis' use of the image of a polyhedron. The author suggests that Polyhedral Christianity calls for an Enspirited Leadership. This spirit-driven leadership is grounded in creational pneumatology and cosmicism to promote resilient religiocultural communities that enjoy a more

relational harmony of all life forms on Earth conscious of an interdependent interconnected oneness in the sacred web of life in the cosmos creation The chapters engage with indigenous notions of sacred sustainability from the primal as well as the Buddhist Hindu and Islamic religious traditions This innovative corpus will be of particular interest to the scholars of theology teolog a del pueblo World Christianity and interreligious relations
