Chinese Family Business and the Equal Inheritance System Victor Zheng,2009-12-17 This book disputes the traditional argument that the equal inheritance system hinders the growth of Chinese family business approaching this not only in terms of economic capital but also in terms of human capital such as education and leadership and social networks Zheng argues that most of the family business patriarchs only focus on the passing on economic capital but give little

attention to human capital and social capital when they come to the stage to transfer control to the next level. It further elaborates that the equal inheritance system itself isn't the destructive force that weakens family business competitiveness but can assist economic development by generating dynamism and capital. Based on extensive primary research, the work discusses how equal division encourages sibling comparison, analysing how such comparisons initially generate stress and anxiety but will ultimately galvanize competition benefiting the business. The author also assesses how family division can offer initial economic, human, and social capitals that can motivate siblings to start their own businesses and be free from the subjugation sometimes associated with a family firm. Through the evaluation of these issues, the book argues that the equal inheritance system can be regarded as the origin of the self-employment mentality which not only fosters the growth of Chinese family business but also plays a crucial role in promoting economic development. Providing a valuable contribution to the field, this work will be of great interest to all scholars of Chinese and Asian business.

Chinese Enterprise, Transnationalism and Identity Terence Gomez, Hsin-Huang Michael Hsiao, 2004-03-01 First Published in 2004, *Chinese Enterprise, Transnationalism and Identity* focuses on one ethnic community, the Chinese, and examines the variety of issues surrounding enterprise development from national and transnational perspectives, starting with the role played by Chinese entrepreneurs in the 1997 Asian financial crisis. Using empirical evidence and theoretical debate, the contributors argue that Chinese enterprise is accelerated by intra-ethnic competition rather than intra-ethnic cooperation and that businessmen work in their own interest, not that of the Chinese community, as other literature dealing with the subject suggests. Themes which this book radically reviews include Culture and networks, Family business, Ownership and control, Transnationalism and identity. By carefully tracing the emergence of new generations, the contributors suggest that new forms of ethnic identification and of national identity and affiliation have emerged. With its combined analysis of ethnic minorities in Asia and

of Chinese business this book will appeal to scholars of Asian and business studies alike

business studies provides the empirical evidence and the basis for insightful comments from the authors on topics which will benefit from further scholarly debate and research. The authors are to be congratulated for making accessible those research contributions which have the potential to make a meaningful difference to the practice of family business. Jill Thomas, The University of Adelaide Business School, Australia. I highly recommend the annotated bibliography by De Massis, Sharma, Chua and Chrisman to experienced scholars as well as to incoming researchers. The authors selected carefully and in a transparent manner relevant papers and summarized them in a way that provides a helpful basis for future research. Well done! Sabine B. Rau, WHU Otto Beisheim School of Management, Germany. A welcome addition to the field of family business studies. Offers an update and thorough compendium of relevant research conducted within the last 15 years. A most useful reference for doctoral students, established scholars and thoughtful practitioners. Importantly, the first three chapters offer critical commentary and synthesis that go well beyond what one typically finds in an annotated bibliography. Overall, this book offers a solid foundation for moving the study of family business forward. Lloyd Steier, University of Alberta, Canada. If I had been asked to suggest the currently most needed editorial endeavor for advancing family business studies, I would have answered with no hesitation: an up-to-date annotated bibliography. The field's growth over the past 15 years has been so intense that even experts who devote most of their research efforts to family business not to mention younger scholars approaching the field will significantly benefit from De Massis, Sharma, Chua and Chrisman's indispensable work. Carlo Salvato, Bocconi University, Italy, and Associate Editor, Family Business Review. This book catalogues the 215 most cited empirical, theoretical and practical articles on family business published in 33 journals since 1996. Researchers, students and practicing managers will find it indispensable as a quick reference and guide to what we have learned about family firms. Annotations for the articles consist of a summary of key findings, research questions, contributions and research implications. They also include a detailed description of the methodologies, empirical data, definitions and conceptual models used. In addition, the book features chapters that review the literature, discuss how family businesses have been defined, present recent trends in family business empirical research and provide an agenda for future research. Scholars, researchers and PhD students in the fields of family business, entrepreneurship, organization theory, management, economics, finance, anthropology, sociology and business history will find this compendium insightful. The topics covered in the book will also prove to be essential to practitioners, both advisors and operators of family enterprises, as it will provide evidence-based knowledge on the issues and dilemmas faced by them in everyday life. **Resources, Technology and Strategy** Nicolai Foss, Paul L.
