perspective and we propose learning based approaches to address the uncertainty and randomness At last we extend the idea of model based and model free algorithms to plug in electric vehicles PEVs charging discharging scheduling problem the key challenge of which involves multiple objectives simultaneously while the behavior of PEVs and the electricity price are intrinsically random This book presents several recent theoretical findings on distributed economic operation in smart grids from model based and model free perspectives By systematically integrating novel ideas fresh insights and rigorous results this book provides a base for further theoretical research on distributed economic operation in smart grids It can be a reference for graduates and researchers to study the operation and management in smart grids Some prerequisites for reading this book include optimization theory matrix theory game theory reinforcement learning etc **Advances in**

Computational Turbulent Incompressible Flow Johan Hoffman, Claes Johnson, 2007-02-13. Applied Mathematics Body Soul is a mathematics education reform program including a series of books together with associated educational material and open source software freely available from the project web page at www.bodysoulmath.org. Body Soul reflects the revolutionary new possibilities of mathematical modeling opened by the modern computer in the form of Computational Calculus (CC) which is now changing the paradigm of mathematical modeling in science and technology with new methods, questions, and answers as a modern form of the classical calculus of Leibniz and Newton. The Body Soul series of books presents CC in a synthesis of computational mathematics (Body) and analytical mathematics (Soul) including applications. Volumes 1-3-36 give a modern version of calculus and linear algebra including computation starting at a basic undergraduate level and subsequent volumes on a graduate level cover different areas of applications with focus on computational methods. Volume 4: Computational Turbulent Incompressible Flow, Volume 5: Computational Thermodynamics, Volume 6: Computational Dynamical Systems. The present book is Volume 4, with Volumes 5 and 6 to appear in 2007 and further volumes on solid mechanics and electromagnetics being planned. A gentle introduction to the Body Soul series is given in 63.
