Kenshi Komatsu, 2019-10-28 People today worry about threats from radiation exposure Such concerns have been backed up in the past when A bombs were used in Hiroshima and Nagasaki during World War II and from exposures which resulted from accidents in nuclear power plants in Chernobyl and Fukushima In the past decade knowledge of the effects of radiation at the molecular level including DNA damage and repair has advanced dramatically This book describes the current state of knowledge in the fields of radiation effects the medical uses of radiation and radiation protection It also considers past nuclear disasters including the accident at Fukushima and trends in nuclear disarmament **Semantic Relations and the**

**Lexicon** M. Lynne Murphy, 2003-10-02 Semantic Relations and the Lexicon explores the many paradigmatic semantic relations between words such as synonymy antonymy and hyponymy and their relevance to the mental organization of our vocabularies Drawing on a century s research in linguistics psychology philosophy anthropology and computer science M Lynne Murphy proposes a pragmatic approach to these relations Whereas traditional approaches have claimed that paradigmatic relations are part of our lexical knowledge Dr Murphy argues that they constitute metalinguistic knowledge which can be derived through a single relational principle and may also be stored as part of our extra lexical conceptual representations of a word Part I shows how this approach can account for the properties of lexical relations in ways that traditional approaches cannot and Part II examines particular relations in detail This book will serve as an informative handbook for all linguists and cognitive scientists interested in the mental representation of vocabulary *Instant Biology*  
Boyce Rensberger, 2017-09-22 YOU RE BORN YOU EAT YOU SLEEP YOU DIE IT S TIME YOU KNEW THE HOWS AND WHYs Whether you re bewildered by the vast number of organisms inhabiting our planet or just crave a clear and comprehensive explanation of the endoplasmic reticulum Instant Biology will guide you through the science that brings the very act of living and dying to life From an enlightening walk down the double helix stairway to a look at Darwin s evolutionary musings on the diversity of existence Instant Biology lays bare the facts of life But Boyce Rensberger goes beyond the birds and the bees to

delight in the details that make science fun like the stubborn micro species of mite that insist on living in your eyelashes With Instant Biology you ll learn Everything you always wanted to know about sex and the single cell How the fuzzy pizza crust under the bed is diligently working its way to the top of the food chain Which is larger the interior surface of your lungs or a badminton court How a species of soil and pond dwellers can dry out shrivel up then return from the dead Instant Biology is crammed with special features including chapter summaries who s who lists biographical and historical tidbits and a host of illustrations photos diagrams and drawings

**Innovators** Donald R. Kirsch,2023-11-07 Scientific breakthroughs that changed the way we understand the world and the fascinating stories of the scientists behind them Some of the most significant breakthroughs in science don t receive widespread recognition until decades later sometimes after their author s death Nobel Prize winner Max Planck whose black body radiation law established the discipline of quantum mechanics stated this as what has become known as Planck s principle commonly summarized as Science progresses one funeral at a time In other words for some truly groundbreaking discoveries a new consensus builds only when proponents of the old consensus die off Breakthrough discoveries require a paradigm shift and it takes time and new minds for the new paradigm to be adopted In Innovators Donald Kirsch tells the stories of sixteen visionary scientists who suffered this fate some now famous like Max Planck himself Galileo and Gregor Mendel and some less well known Among them are Barbara McClintock who working with Indian corn discovered transposons also known as jumping genes which provide a major mechanism driving biological evolution Rachel Carson catalyst for the environmental movement and Roger Revelle the climatologist whose findings were the first to be described by the term global warming The breakthroughs cover fields from biology to medicine to physics and earth sciences and include the discovery of prions life changing treatments such as drugs for high blood pressure ulcers and organ transplantation the process of continental drift and our understanding of how molecules form matter
