The Language of Landscape Anne Whiston Spirn, 1998-01-01 This eloquent and powerful book combines poetry and pragmatism to teach the language of landscape Anne Whiston Spirn author of the award winning The Granite Garden Urban Nature and Human Design argues that the language of landscape exists with its own syntax grammar and metaphors and that we imperil ourselves by failing to learn to read and speak this language To understand the meanings of landscape our habitat is to see the world differently and to enable ourselves to avoid profound aesthetic and environmental mistakes Offering examples that range across thousands of years and five continents Spirn examines urban rural and natural landscapes She discusses the thought of renowned landscape authors Thomas Jefferson Frank Lloyd Wright Frederick Law Olmsted Lawrence Halprin and of less well known pioneers including Australian architect Glenn Murcutt and Danish landscape artist C Th S rensen She discusses instances of great landscape designers using landscape fluently masterfully and sometimes cynically And in a probing analysis of the many meanings of landscape Spirn shows how one person s ideal landscape may be another s nightmare how Utopian landscapes can be dark There is danger when we lose the connection between a place and our understanding of it Spirn warns and she calls for change in the way we shape our environment based on the notions of nature as a set of ideas and landscape as the expression of action and ideas in place

Rude Stone Monuments in All Countries: Their Age and Uses James Fergusson, 2023-10-25 In Rude Stone Monuments in All Countries Their Age and Uses James Fergusson meticulously examines the enigmatic megaliths that dot various landscapes from Stonehenge in England to lesser known sites worldwide Employing a comparative approach Fergusson blends meticulous archaeological analysis with rich descriptive prose crafting a narrative that is as engaging as it is informative His attention to the cultural contexts of these structures offers readers insights into the ancient societies that erected them while challenging prevailing assumptions about their purposes whether as burial sites astronomical observatories or religious sanctuaries This work is a commendable fusion of exploration and scholarship positioned within the 19th century intellectual milieu which grappled with the intersections of archaeology anthropology and history James Fergusson 1808 1886 a Scottish architectural historian and archaeologist was driven by his passion for understanding the built environment s role in human civilization His extensive travels and studies in architecture and antiquity deeply informed his perspectives on megalithic structures Fergusson s background in architecture coupled with the burgeoning interest in prehistoric monuments during his time positioned him uniquely to undertake this

The Old Stones of Scotland Andy Burnham, 2019-01-01 Where to start with Scotland From what amounts to a stone circle showroom at Machrie Moor on Arran in the southwest up to Orkney in the far north where some of Britain's most spectacular prehistoric remains can be found there are amazing sites of all types up and down the country Some settings are unexpected Balfarg one of Scotland's largest henge monuments is situated in the centre of a 1980s housing estate in Fife while the stone circle of Craighead Badentoy in Aberdeenshire is surrounded by huge industrial containers If you don't have long then the Isle of Arran or Kilmartin Valley Argyll are good choices as both are reachable in a day from Glasgow and contain a wealth of prehistoric monuments If you have longer then consider visiting Orkney or Western Isles such as Lewis and Harris for world famous sites as well as hundreds of lesser known treasures The Old Stones of Scotland is part of a series covering the megalithic and other prehistoric sites of Britain and Ireland The series is published together as **The Old Stones A Field Guide to the Megalithic Sites of Britain and Ireland** available as a book and an ebook **Guide Stone Monuments in All Countries** James Fergusson, 2023-03-24 Reprint of the original first published in 1872 The publishing house Anatiposi publishes historical books as reprints Due to their age these books may have missing pages or inferior quality Our aim is to preserve these books and make them available to the public so that they do not get lost Night Stone Rick

Gage, 2008 This handbook is the first comprehensive field guide to both agricultural and Native American stone structures found throughout northeastern United States These stone structures include stone cairns chambers standing stones niches enclosures stone walls foundations wells pedestal boulders Manitou stones and other structures The handbook provides the means to identify document analyze and interpret these structures

The Megaliths of Northern Europe Magdalena Midgley, 2008-07 The North European megaliths are among the most enduring structures built in prehistory they are imbued with symbolic meanings which embody physical and conceptual ideas about the nature of the world inhabited by the first Northern farmers The Megaliths of Northern Europe provides a much needed up to date synthesis of the material available on these monuments incorporating the results of recent research in Holland Germany Denmark and Sweden This research has brought to light new data on the construction of the megaliths and their role in the cultural landscape and Magdalena Midgley offers a fascinating interpretation of the symbolism of megalithic tombs within the context of early farming communities This wealth of new evidence suggests the Northern European megaliths were important foci in the wider north west European context The construction of dolmens and passage graves using huge glacial boulders demanded both great communal effort and considerable skill In addition to this technical expertise the master builders also made use of their esoteric knowledge of rituals This was expressed in the use of exotic building materials and special architectural features and in the placement of tombs within the natural and cultural landscapes creating new metaphors and images Fully illustrated this book will be of interest to both undergraduate and postgraduate students of European Prehistory Archaeology and Prehistoric Anthropology as well as architects who study ancient architecture and social anthropologists who study modern megaliths
