whereby workers restart troubled bankrupt or shuttered companies as cooperatives or other forms of democratic workplace. The book argues that WREs are prefigurative of new forms of work based on equality and sustainability. Framed by the concepts of autogestión in the labour commons and prefigurative ethico-political practices, the book argues that WREs contribute to the construction of more directly democratic community economies. Drawing on a range of contemporary case studies from numerous countries in the Global South and North as well as new theories of workers self-management, the book contributes a critical development political economic and class struggle Marxist perspective to the re-emergent labour question within anti-systemic social movements while theorizing the transformative nature of WREs for workers work organizations and communities. Bringing a class analysis back into current discourses and debates concerning democracy at work and alternatives to global capital, this book will be of interest to researchers across the fields of development studies, labour studies, political economy, sociology of development, sociology of work and political science.

Languages of Economic Crises Sonya Marie Scott, 2021-09-26 This book offers a critical engagement with languages that describe, perpetuate, respond to and resist economic crises. Unlike many volumes on economic crises that offer economic explanations of their causes or policy suggestions for their resolution, this collection explores the different types of language used to deal with complex economic phenomena. The chapters in this volume examine a range of connections between language and crises, from the metaphors used historically to describe economic crises to the languages deployed within periods of crises and economic struggle to the popular responses thereto, including political manifestations and worker-organized enterprises. Also considered are the implications for democratic participation and gender relations and the lack of language to express economic experience amongst certain groups. With essays from seven contributors representing five different countries, this collection has global relevance in a time marked by economic volatility and upheaval and will serve as a valuable resource for those interested in the politics of language, economic discourse and the epistemological complexities of economic crises. The chapters in this book were originally published as a special issue of the *Journal of Cultural Economy*.

Workers' Self-Management in Argentina Marcelo Vieta, 2020-01-07 In *Workers Self-Management in Argentina*, Marcelo Vieta homes in on the emergence and consolidation of Argentina's *empresas recuperadas por sus trabajadores* (ERTs), worker-recuperated enterprises, a workers' occupy movement that surged at the turn of the millennium in the thick of the country's neo-liberal crisis. Since then, around 400 companies have been taken over and converted to cooperatives by almost 16,000 workers. Grounded in class struggle Marxism and a critical sociology of work, the book situates the ERT movement in Argentina's long tradition of working class activism and the broader history of workers' responses to capitalist crisis. Beginning with the voices of the movement's protagonists, Vieta ultimately develops a compelling social theory of autogestión, a politically prefigurative and ethically infused notion of workers self-management that unleashes radical social change for work organisations surrounding communities and beyond. *Workers Self-Management in Argentina* received an Honorable Mention from the 2022
