**Environmental and Biomedical Applications** Susheel Kalia, Luc Avérous, 2016-01-29 This volume incorporates 13 contributions from renowned experts from the relevant research fields that are related biodegradable and biobased polymers and their environmental and biomedical applications Specifically the book highlights Developments in polyhydroxyalkanoates applications in agriculture biodegradable packaging material and biomedical field like drug delivery systems implants tissue engineering and scaffolds The synthesis and elaboration of cellulose microfibrils from sisal fibres for high performance engineering applications in various sectors such as the automotive and aerospace industries or for building and construction The different classes and chemical modifications of tannins Electro activity and applications of Jatropha latex and seed The synthesis properties and applications of poly lactic acid The synthesis processing and properties of poly butylene succinate its copolymers composites and nanocomposites The different routes for preparation polymers from vegetable oil and the effects of reinforcement and nano reinforcement on the physical properties of such biobased polymers The different types of modified drug delivery systems together with the concept of the drug delivery matrix for controlled release of drugs and for antitumor drugs The use of nanocellulose as sustainable adsorbents for the removal of water pollutants mainly heavy metal ions organic molecules dyes oil and CO<sub>2</sub> The main extraction techniques structure properties and different chemical modifications of lignins Proteins and nucleic acids based biopolymers The role of tamarind seed polysaccharide based multiple unit systems in sustained drug release      *The Tamarind Seed* Evelyn Anthony, 1971      **Tamarind K.** El-Siddig, 2006      *Nuts and Seeds in Health and Disease Prevention* Victor R Preedy, Ronald Ross Watson, 2020-05-17 Nuts and Seeds in Health and Disease Prevention Second Edition investigates the benefits of nuts and seeds in health and disease prevention using an organizational style that will provide easy access to information that supports identifying treatment

options and the development of symptom specific functional foods This book examines seeds and nuts as agents that affect metabolism and other health related conditions and explores the impact of compositional differences between various seeds and nuts including differences based on country of origin and processing technique Finally the book includes methods for the analysis of seed and nut related compounds Written for nutrition researchers nutritionists food scientists government regulators of food and students of agriculture oils and feeds nutrition and life sciences this book is sure to be a welcomed resource Identifies options and opportunities for improving health through the consumption of nut and seed products Provides easy access to information that supports the identification of treatment options Contains insights into health benefits that will assist in development of symptom specific functional foods Examines seeds and nuts as agents that affect metabolism and other health related conditions Explores the impact of compositional differences between various seeds and nuts including differences based on country of origin and processing technique Includes methods for analysis of seed and nut related compound

Value Added Products From Food Waste Elsa Cherian,Baskar Gurunathan,2024-03-21 The rapid increase in industrial processes for the preparation and processing of various food products have resulted in the creation of large quantities of waste These food wastes contain large amounts of nutrients which can be further converted into useful products making byproduct technology increasingly important Byproducts produced from various agro based industries like cereals fruits vegetable processing fish meat and poultry can be converted into beneficial products For instance cereal and legume processing produces large quantities of wastes which can result in environmental problems affecting air soil and water quality These wastes can be efficiently utilized and converted into value added products such as bioethanol butanol biohydrogen biogas biocoal industrially treasured enzymes biofertilizer proteins and organic acids Value Added Products From Food Waste covers waste management techniques utilized for managing raw materials in the food industry in an efficient way recovering and reusing waste or neutralizing unwanted components Chapters focus on the latest technologies and efficient management systems in all areas of food processing that make this process economical and minimize the hazards caused by the deposition of waste From the dairy industry to cereals to fruits and vegetables to fish each aspect of the food industry is examined with an eye for how to utilize food waste transforming these wastes into value added products

**Applications** Amit Kumar Nayak, Md Saquib Hasnain, Dilipkumar Pal, 2019-10-16 This new volume Natural Polymers for Pharmaceutical Applications Volume 1 Plant Derived Polymers presents some of the latest research on the applications of natural polymers in drug delivery and therapeutics for healthcare benefits Polymers and their applications from several plants are discussed in depth including tamarind gum gum Arabic natural carbohydrate polymer gum tragacanth pectin guar gum and its derivatives locust bean gum sterculia gum okra gum and others The use of the polymers derived from plants as potential pharmaceutical excipients is expanding day by day because of their stability in the biological system drug releasing

capability drug targeting abilities as well as their bioavailability

**Handbook of Biopolymers** Shakeel Ahmed, Suvardhan Kanchi, Gopalakrishnan Kumar, 2018-10-31 Biopolymers have the potential to cut carbon emissions and reduce carbon dioxide in the atmosphere. The carbon dioxide released when they degrade can be reabsorbed by plants which makes them close to carbon neutral. Biopolymers are biodegradable and some are compostable too. This book presents key topics on biopolymers including their synthesis, characterization and physiochemical properties and discusses their applications in key areas such as biomedicine, agriculture and environmental engineering. It will serve as an in-depth reference for the biopolymer industry, material suppliers and processors, producers and fabricators and engineers and scientists who are designing biopolymers or evaluating options for switching from traditional plastics to biopolymers.

*COMPENDIUM OF FOOD ADDITIVE SPECIFICATIONS* Food and Agriculture Organization of the United Nations, World Health Organization, 2018-06-18 This document contains food additive specification monographs, analytical methods and other information prepared at the eighty-fourth meeting of the Joint FAO/WHO Expert Committee on Food Additives (JECFA) which was held in Rome 6-15 June 2017. The specification monographs provide information on the identity and purity of food additives used directly in foods or in food production. The main three objectives of these specifications are to identify the food additive that has been subjected to testing for safety to ensure that the additives are of the quality required for use in food or in processing and to reflect and encourage good manufacturing practice. This publication and other documents produced by JECFA contain information that is useful to all those who work with or are interested in food additives and their safe use in food.

**Chemistry and Technology of Natural and Synthetic Dyes and Pigments** Ashis Kumar Samanta, Nasser Awwad, Hamed Majdooa Algarni, 2020-09-30 This book on Chemistry and Technology of Natural and Synthetic Dyes and Pigments is a priority publication by IntechOpen publisher and it relates to sustainable approaches towards green chemical processing of textiles specifically on dyeing with natural dyes and pigments as well as dyeing with eco-safe synthetic dyes and chemicals. This book includes the following chapters: an introductory editorial chapter on bio-mordants, bio-dyes and bio-finishes; a review of natural dyes and pigments and its application; pantone-like shade generation with natural colorants; colour-based natural dyes and pigments; printing with natural dyes and pigments; functional property and functional finishes with natural dyes and pigments; eco-safe synthetic dyes and chemicals; and a miscellaneous review on dyed textiles and clothing including natural dye-based herbal textiles. This new book is expected to be useful for dyers of the textile industry as well as to the future researchers in this field.

*Seeds: Anti-proliferative Storehouse for Bioactive Secondary Metabolites* Dilip Kumar Pal, 2024-08-31 This book presents extensive and up-to-date information on the anti-proliferative properties of various plant seeds for their application in pharmaceutical industry and medicinal research. This information is imperative for understanding and developing high-quality products from the seeds. The book provides insights about anticancer and antitumour activities present in seeds. Different chapters cover the traditional knowledge as well as recent innovations in

various seeds such as prune pumpkin grape fruit sesame sunflower bitter gourd papaya mango apple black plum cumin water melon musk melon cotton carambola pear cardamon moringa wallich Chinese cabbage pistachio etc and their bioactivities for the applications in cancer and malignancy proliferation The book introduces the readers to seed as a bioactive compound and delineates the various health effects It further explains the relation between the different metabolites and their effect on cell proliferation Finally the book goes on to explain different seeds and their specific anti cancer properties This book is useful for students and researchers of pharmacology botany and cancer research It also caters to industry experts in pharmaceutical sciences

**Sustainable Horticulture in Semiarid Dry Lands** Shrikant Hiwale, 2015-03-16 This book discusses ways of increasing production unit area by making full use of the soil and water under the harsh climatic conditions of semiarid areas This leads to improved sustainability increased availability of fresh produce which is vital for human health and higher incomes for small and marginal farmers Arid and semiarid areas account for almost 70 per cent of the total cropped area of India In these areas physical constraints like low and erratic rainfall high temperature high wind velocity low fertility poor soil structure salinity of soil and ground water all limit reliable crop production In the absence of any type of aggregation the soils are highly erodible lack structure and have a very coarse in texture with low water holding capacity Intensive agricultural practices increasing population pressure climatic changes environmental pollution loss of biodiversity soil erosion salinization and water depletion are all threatening the sustainability of agriculture In view of the mounting demand for food it is vital to link enhanced food production with nutritional security

conservation of natural resources increasing farmers incomes employment generation through agricultural diversification Horticulture particularly of fruit trees can play a major role in solving the problem of nutrition as fruits are rich source of vitamins and minerals and have antioxidant properties Fruit trees which are mostly deciduous add leaf litter to the soil and this ultimately helps to improve the condition of the soil In addition fruit trees are known to reduce soil erosion and reduce run off The trees also play a major role in purifying the environment as they are the known carbon sequesters Fruit tree cultivation is a profitable proposition There is no scope to increase the land surface all increase in productivity therefore has to be from the available land This means introducing cropping systems that can meet the basic food fodder and fuel requirement of farming families
