Taming the Mind Buddhist Publication Society, 1962

The Mind Code Sanjeev Sareen, 2023-08-08 The world outside is recognized and experienced by us but only as interpreted by our own mind and intellect The world outside can make us smile in joy or make us weep in sorrow but only by reaching us through our minds As is the mind so is the world According to the constitution of our mind is our experience of the world Therefore mental control and mental development as modern educationists say is most important Mental health influences how we think feel and behave impacting our emotions relationships and decision making Good mental health helps cope with stress build resilience and adapt to life s challenges Just as we engage in physical exercise eat

a balanced diet and practice preventive care for our bodies we should also invest in practices that promote mental well being Real happiness does not come from worldly positions and possessions it completely depends on our ability to calm and control our agitated mind because the mind is the cause of our pleasure and pain A calm and controlled and pure mind experiences bliss It is indeed a rare thing to find a mind that is not affected by its contact with fluctuation Like heat which is inseparable from fire The minds of the vast majority of people have been allowed to run wild and follow their own sweet will and desire It is ever changing and wandering It jumps from one object to another It is fickle It wants variety It is like a spoiled child who is given too much indulgence by its parents or a badly trained animal Restraint of the mind is a thing unknown to the vast majority of people It s essential to recognize that mindsets are not peripheral but central to health and behavior If we truly want to tackle the diseases and crises of our time we need to more effectively acknowledge and leverage the power of mindset So much effort notably in public health campaigns is geared toward motivating people to change their behavior eat healthier exercise more and stress less but an important variable is being left out of the equation people s mindsets about those healthy behaviors We experience these things regularly and yet we re not cataloging them as something that matters For whatever reason dualism or prioritization of the material we tend to ignore the fact that our thoughts mindsets and expectations are shaping our everyday physiology We can explain every human behavior in terms of the mind involved in it Since the mind instructs the body to behave in a definite way every resultant behavior is having a minimum of two aspects the physical and the mental To have an effective behavior we try to maintain a balance between the two In this process the effective behavior in which mind and body work together without dominating each other becomes spiritual in nature To attain Self realisation one must constantly struggle with the mind for its purification and steadiness The nature of the human mind however is very difficult to understand because it is very subtle as well as hidden But the mind is very plastic if you know the secret of its manipulation You can bend it any way you like You can rewire the brain The Power of the Mind Is Limitless But whatever you can truly convince the mind you can do you can do Since everything is made out of the mind it can be controlled by the mind As you develop more and more mental strength you will be able to do anything You Create Your Own Helplessness or Strength The helplessness you feel is caused by no one but yourself It is an insult to your mind and the image of God within to allow yourself to be hypnotized by these limitations You must break your bad habits and develop the power of the mind by which you can command your own life Mind Works if You Know How to Control It The matter has come out of the mind hence the mind has no physiological limitations Therefore if you can control the mind the whole world will gravitate toward you Every study should have a practical as well as a theoretical side You can acquire a mental concept from a story you read in a book but its practical value in daily life remains to be seen All too often the intellect becomes satisfied with just the theory but greater and more glorious is the actual perception of the truth contained in that theory Success doesn t lie in listening to the sermons but in practicing them There are ways to develop mind power

Do not be a helpless failure Control your destiny by changing your thoughts Do whatever you make up your mind to do According to spiritual science the attitude of the mind is everything The mind is the repository of infinite power You become your worst enemy when you limit your mental power To work with your mind is tremendously worthwhile You haven't tried its powers at all Breaking through mental limitations is what you should strive for This book will guide you toward that

Taming the Ox of the Mind Essence Oh All Wise One The Guru BAPR ALHF KM,2012-08-02 This story of The Ten Ox Herding Paintings originated in twelfth century China Accompanied with poetry and text these paintings depict the process of going through practice meditation as a path to enlightenment divided into ten simple steps The paintings adorn the walls of Buddhist temples the poetry and text are used today in teaching practice Countless versions of the paintings exist and volumes have been written on the theme The consensus is that we are all seekers on the same pilgrimage of self discovery A brave young lady named Alice sets off on her pilgrimage not knowing where not certain why This takes enormous courage that most of us struggle to find Many of her Wonderland friends gather round offering advice to help Alice on her journey Throw in a helping hand from some of our spiritual masters gods Buddhas gurus roshis philosophers poets and writers and finally Alice may be ready to answer a profound pondering of her creator Lewis Carroll when he asks Who in the world am I Ah that is the great puzzle

The Power of Mind Khentrul Lodrö T'hayé Rinpoche,2022-09-06 A modern guide to lojong ancient Buddhist techniques for transforming all circumstances including pain anxiety and stress into mental well being that benefits us and the people around us We've all heard platitudes about cultivating love and compassion but how can we actually develop these qualities in ourselves and crucially share them in our world The Power of Mind provides the proven path of lojong or mind training for changing our experience from the inside out Regardless of what's happening in our lives Khentrul Rinpoche teaches that our route to freedom lies in our minds A thousand years ago the Indian saint Atisha risked his life to seek out lojong teachings in Indonesia and then brought them to Tibet where they flourished and spread to the rest of the world This book introduces those teachings the Seven Key Points of Mind Training which have been passed down from teacher to student for centuries Khentrul Rinpoche was inspired by his own teachers who like alchemists were able to follow these techniques during the Cultural Revolution and transform their immense suffering into something positive The Power of Mind guides the reader through these transformative practices one by one from recognizing the value of our human life to overcoming the sources of suffering together with meditation advice for incorporating these insights into our daily lives This wisdom is accessible to everyone whether Buddhist or not As Khentrul Rinpoche states Peace and happiness can be attained but not by searching for something in the outside world They start within us then extend out to the entire globe

Creation and Completion Jamgon Kongtrul,2014-05-01 Creation and Completion represents some of the most profound teachings of Jamgon Kongtrul 1813-99 one of the true spiritual and literary giants of Tibetan history Though brief it offers a lifetime of advice for all who wish to engage in and deepen the practice of tantric Buddhist meditation The original text beautifully

translated and introduced by Sara Harding is further brought to life by an in depth commentary by the contemporary master Thrangu Rinpoche Key Tibetan Buddhist fundamentals are quickly made clear so that the reader may confidently enter into tantra's oft misunderstood creation and completion stages In the creation stage practitioners visualize themselves in the form of buddhas and other enlightened beings in order to break down their ordinary concepts of themselves and the world around them This meditation practice prepares the mind for engaging in the completion stage where one has a direct encounter with the ultimate nature of mind and reality
