Taming the Vernacular addresses the syntax and morphology of nonstandard varieties of different languages and the relationship between standard and nonstandard varieties. It is interesting, and worthwhile reading because of the range of languages — Dutch, English, Finnish, French, German, Galician, Italian — and because some of the authors tackle general issues concerning standard and nonstandard varieties. I will summarize the contents and then provide a general critique bearing on the general coherence of such collections of papers as this, on the need to distinguish linguistic and sociolinguistic facts and to take both into account (see Cameron, 1995), and on the concept of different grammatical (linguistic) systems.

Chapter 1, by Jenny Cheshire and Dieter Stein, lists the recurring themes in the book: the problems of collecting data; the regrettable focus of earlier work on phonology to the exclusion of syntax, all the more regrettable because of the central role of syntax in standardization; the lack of theoretical work on standard and nonstandard varieties and the extent to which they can be considered as sharing a single system of grammar; the efforts of grammarians to tidy up the fuzziness and indeterminacy of spoken language, to strip out emotive meanings and to make written language different from spoken language; the orientation of teaching models towards written language and the images of language that dominate within a given society. (The last theme is not in fact taken up in the other chapters but cannot be avoided by readers who have given thought to language and education.)

In Chapter 2 Jaap van Marle discusses Dutch morphosyntax, relating it to the deliberate cultivation and elaboration of language structure. In Chapter 3 Dieter Stein offers various principles that appear to govern the elaboration of written language. Chapter 4 contains a discussion by Maria Vilkuna of why a particle that plays a central role in the organization of spoken Finnish discourse has been excluded from written language. (Finnish case marking is discussed in Chapter 8 by Lea Laitinen.) Chapters 5 and 6, by Jenny Cheshire and Gunnel Melchers respectively, deal with what Chafe and Biber call involvement. Cheshire analyzes the use of *never* (as in *I never locked the door when I left the house this morning*) and *that* (as in *It's not that far*). Melchers analyzes the demise of the three-term deictic system in English. Chapter 7 presents a discussion by Günter Rohdenburg of how choice of grammatical variants in Northern Low German is largely governed by phonological
