Tancook Schooners An Island And Its Boats:

Tancook Schooners Wayne M. O'Leary,1994 The Tancook Schooners recounts the history of a remarkable yet neglected Atlantic Canadian watercraft The little Bluenoses as they were called formed the backbone of Nova Scotia s inshore fisheries and short run coastal trade in the early twentieth century The book also records the story of a unique although in many ways typical Maritime coastal community on the brink of the modern industrial age *The Archaeology of Vernacular Watercraft* Amanda M. Evans,2016-04-19 This volume presents multiple idiographic archaeological studies of vernacular watercraft from North America and the Caribbean Rather than attempt to synthesize all vernacular types this volume focuses on ship construction data recovered through archaeological investigations that has been used to make inferences about culture This collection of case studies including many examples from cultural resource management and graduate student theses presents a thematic exploration of cultural adaptation as expressed through ship construction **Maritime History at the Crossroads** Frank Broeze,2017-10-18 This volume seeks to critically review the contemporary state of maritime historiography as it stands at the volume s publication date of 1995 The volume is comprised of thirteen essays each focused on the recent research into the maritime concerns of a particular geographical location listed as follows Australia Canada China Denmark Germany Greece Ibero America India the Netherlands the Ottoman Empire Spain the United States and a final chapter concerning historians and maritime labour in Britain Australia and New Zealand One concern made evident by the collection is the lack of stable identity and cohesive aims within maritime history the subject holds many conflicting definitions and concepts The purpose of this volume is to explore the recent developments in maritime history plus the growth of scholarly interest to provide a beacon and stimulus for future work and to clearly direct and define maritime historiography toward a solid position in the field of history **Building a Better Boat** Donald J. Feltmate,2025-09-19 During the first half of the twentieth century economic recession a lack of government support and the incursion of large draggers on coastal fishing grounds meant many inshore fishing communities were facing poverty and starvation The formation of fishers cooperatives started a movement toward recovery and the introduction of the internal combustion engine along with the development of a new medium sized fishing vessel equipped with mechanical haulers meant groundfishers who had previously employed handlines from small boats with a single hook could now haul multiple trawl lines from a single vessel The development of the government approved Cape Island type longliner was perhaps one the most significant achievements in the survival of Nova Scotia s struggling inshore fishery Sadly this important history has gone largely unrecorded With the help of in depth archival research and more than thirty little known historical photographs Building a Better Boat chronicles the history of the recovery of the shore fishery and the development of a new fishing craft known as wooden Cape Island type longliners It is a story that needs to be told if for no other reason than to honour the brave fishing families who persevered through poverty and hunger and who despite all odds developed a vessel that would help them

secure their own futures and that of future generations
