Zaloga,2025-04-24 An essential guide to the tanks that fought the greatest armored clashes of modern times between

Saddam Hussein's Soviet-supplied army and the advanced tanks fielded by the Coalition in the Gulf War of 1991 was the largest tank vs tank confrontation of the modern era and the only large scale tank combat ever to involve major NATO armies. With the Iraqi Army equipped primarily with modern Soviet and Warsaw Pact built tanks it was also a rare example of how NATO tanks performed in combat against their Eastern Bloc rivals. In this book, world expert on tank technology Steven J. Zaloga examines the numerous tank types used in this conflict and how they compared both in technology and battlefield performance. Besides covering the tanks of the United States, Britain and France, it also examines those of other Allied forces including Saudi Arabia and Kuwait. It not only covers Iraq's Soviet and Warsaw Pact built tanks but also its vigorous indigenous military industry which produced a number of notable innovations such as the Enigma tank with laminate armor. Unravelling the detail behind the greatest tank war of modern times, packed with data and illustrated with superb new artwork and numerous photos including some never before published and detailed descriptions of the little known Iraqi armored division markings.

US Battle Tanks 1946-2025 Steven J. Zaloga, 2024-11-07. A comprehensive and detailed illustrated examination of the development and combat performance of US battle tanks from the end of World War II through to the present day. In this, the second of two highly illustrated volumes telling the full history of the design, development and operational use of US Army and US Marine Corps battle tanks, Steven J. Zaloga takes the story from the end of World War II through the US-Soviet rivalry of the Cold War period right up to the latest developments in American armored technology. *US Battle Tanks 1946-2025* draws and expands on material published in Osprey's New Vanguard and Duel series to explain how the US Army attempted to come to grips with the challenges of the nuclear battlefield and examines the introduction of new tank designs such as the famous Patton tank series as well as short-lived attempts to develop more radical tanks such as the T95. It covers the overly ambitious and failed MBT 70 tank program and the more austere M1 Abrams that followed, a tank that proved to be the best US tank design of the post World War II period and one that is still in service today. Published in association with the AUSA Book Program offering quality books about US Army heritage, military theory and policy and security in the modern world.

M1 Abrams vs T-72 Ural Steven J. Zaloga, 2011-01-01. A thorough investigation of the strengths and weaknesses of two of the twentieth century's most lethal combatants, the M1 Abrams and the T-72. The Gulf War bore witness to a number of deadly encounters between these two great adversaries. Heavily armoured, highly mobile and capable of killing at over 2500m, the M1 Abrams is to this day a veritable fighting machine. Superior to both Iraq's Soviet-era T-55 and T-62 tanks, nearly all sources claim that no Abrams tank has ever been destroyed by enemy fire. Despite entering service in 1980, the M1 Abrams remained untested in combat until the Gulf War in 1991 where it was to be confronted by its arch-enemy, the Iraqi-assembled Soviet-designed T-72. Entering production in 1971, the T-72 arguably outstripped its contemporaries in a balance of mobility, protection and firepower. By the

time of Operation Desert Storm however the tables had turned and the tank suffered due to low quality ammunition and poorly trained crews In this fascinating study Steven Zaloga pits these two great fighting machines against one another plotting the development of the Cold War until both tanks met in combat in the deserts of Iraq and Kuwait
