**Tao Te Ching: a Guide to the Interpretation of the Foundational Book of Taoism** Shantena Augusto Sabbadini, 2013-04-08 The Tao Te Ching is the foundational text of Taoism Traditionally considered the work of the Old Master Lao Tzu a senior contemporary of Confucius this 2500 years old text is a poetic and supremely concise formulation of

some of humanity's highest wisdom. Revered as a basic book of spiritual guidance throughout Chinese history, it has become a beloved inspirational work in the West. The present work is meant to help the Western reader to penetrate the depth and subtlety of Lao Tzu's wisdom without requiring a knowledge of the Chinese language. Readers are offered a choice between various interpretations and are guided in non-technical terms to explore how they originate. More importantly, they are also offered the possibility to hold all the various resonances of the text simultaneously, just as a Chinese reader would, and thus access the original wealth of meaning in a way no ordinary translation could convey.

*Bibliography of the History of Medicine*, *The Praeger Handbook of Personality across Cultures*. A. Timothy Church Ph.D., 2017-07-14. This important multivolume work sheds light on current and future research on cultural universals and differences in personality in their evolutionary, ecological, and cultural contexts. How does culture impact personality traits? To answer that question, the three volumes in this set address current theory and research on culture and personality in an effort to determine how people differ and how they are alike. Detailed chapters by scholars from around the world unveil a fascinating picture of the relationship between culture and important aspects of personality. They also address the accuracy or meaningfulness of trait comparisons across cultures and the methods and limitations of research on the subject. As most psychological research is conducted on participants from Western industrialized countries, a work that includes a wide range of cultures not only fosters a more complete understanding of human personality but also broadens perspectives on value systems and ways to live. Each of the three volumes concentrates on distinct areas of research, exposing the reader to the diverse theoretical and empirical approaches and topics in the field. Volume 1 focuses on the cross-cultural study of personality dispositions or traits. Volume 2 examines the relationship between culture and other important aspects of personality, including the self, emotions, motives, values, beliefs, and life narratives, as well as aspects of personality and adjustment associated with biculturalism and intercultural competence. Volume 3 looks at evolutionary, genetic, and neuroscience perspectives on personality across cultures, along with ecological and cultural influences. In addition to providing readers with a thorough analysis of current and future directions for research, this unrivaled work brings together multiple perspectives on personality across cultures, thereby promoting a more integrative understanding of this important topic.
