Task-Based Language Teaching in Foreign Language Contexts Ali Shehadeh, Christine A. Coombe, 2012-10-17 This volume extends the Task Based Language Teaching Issues Research and Practice books series by deliberately exploring the potential of task based language teaching TBLT in a range of EFL contexts It is specifically devoted to providing empirical accounts about how TBLT practice is being developed and researched in diverse educational contexts particularly where English is not the dominant language By including contributions from settings as varied as Japan China Korea Venezuela Turkey Spain and France this collection of 13 studies provides strong indications that the research and implementation of TBLT in EFL settings is both on the rise and interestingly diverse not least because it must respond to the distinct contexts constraints and possibilities of foreign language learning The book will be of interest to SLA researchers and students in applied linguistics and TESOL It will also be of value to course designers and language teachers who come from a broad range of formal and informal educational settings encompassing a wide range of ages and types of language learners

Reflections on Task-Based Language Teaching Rod Ellis, 2018-06-18 Task based language teaching is now a well established pedagogic approach but problematic issues remain such as whether it is appropriate for all learners and in all instructional contexts This book draws on the author's experience of working with teachers together with his knowledge of relevant research and theory to examine the key issues It proposes flexible ways in which tasks can be designed and implemented in the language classroom to address the problems that teachers often face with task based language teaching It will appeal to researchers and teachers who are interested in task based language teaching and the practical and theoretical issues involved It will also be of interest to students and researchers working in the areas of applied linguistics TESOL and second language acquisition

Task-Based Language Teaching from the Teacher's Perspective Martin East, 2012-01-01 Task based language teaching TBLT is being encouraged as part of a major overhaul of the entire school languages curriculum in New Zealand However teachers often struggle with understanding what TBLT is and how to make TBLT work in classrooms Using the stories that emerged from a series of interviews with teachers the curriculum implementers and with advisors the curriculum leaders this book highlights the possibilities for TBLT innovation in schools It also identifies the constraints and proposes how these might be addressed The result is a book that whilst rooted in a particular local context provides a valuable sourcebook of teacher stories that have relevance for a wide range of people working in a diverse range of contexts This book will be of genuine interest to all those who wish to understand more about

TBLT innovation and the opportunities and challenges it brings **Task-Based Language Learning and Teaching with Technology** Michael Thomas, Hayo Reinders, 2010-11-04 *Task-based Language Learning and Teaching. Improvement with the Help of Webquests?* David Knobelspies, 2022-01-12 Seminar paper from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 5 course Task based Language Learning and Teaching language English abstract This paper deals with the question if Webquests do help to improve the Communicative Language Learning Process and Taskbased Language Learning in general Even though research confirms language learning or rather task based language learning is part of the communicative approach to language learning there is still frequently believed in approaches that regard language learning as a linear process Within the scope of such linear processes in terms of language learning several language items are meant to be put together In contrast to this approach task based approaches recognize language learning as imponderable or rather hardly predictable *Second Language Acquisition and Task-Based Language Teaching* Mike Long, 2014-07-31 This book offers an in depth explanation of Task Based Language Teaching TBLT and the methods necessary to implement it in the language classroom successfully Combines a survey of theory and research in instructed second language acquisition ISLA with insights from language teaching and the philosophy of education Details best practice for TBLT programs including discussion of learner needs and means analysis syllabus design materials writing choice of methodological principles and pedagogic procedures criterion referenced task based performance assessment and program evaluation Written by an esteemed scholar of second language acquisition with over 30 years of research and classroom experience Considers diffusion of innovation in education and the potential impact of TBLT on foreign and second language learning *Task-Based Language Learning* Peter Robinson, 2011-06-13 This volume contains papers addressing issues in task based research into second language learning which are essential to informed pedagogic decision making about how best to achieve this aim These issues include research into the design characteristics of pedagogic tasks that promote the accuracy fluency and complexity of learner language the role of individual differences in the motivational and other cognitive variables that demands made by pedagogic tasks draw on the extent to which tasks and teacher interventions during task performance promote the quantity and quality of interaction that facilitate L2 learning and the generalizability of task based research in laboratory contexts to classroom settings **Task-Based Language Learning and Teaching** Nicole Jan, 2019-03-06 Seminar paper from the year 2016 in the subject Didactics for the subject English Pedagogy Literature Studies grade 1 6 University of Frankfurt Main England and American Studies Didactics Department course Integrating Skills and Task Based Language Learning language English abstract In the following term paper I would like to give a brief overview about task based learning in general and the way it provides effective language learning with the help of motivational tasks in order to show that in class language practice does not necessarily have to be an artificial situation In modern second language teaching the role of task based learning has become a very important topic Due to the fact that

many exercises in EFL classrooms have no clear connection to real world situations researchers and modern English teachers try to put emphasis on tasks which help learners to use the target language effectively in different situations outside the classroom This term paper has its focus on the implementation of task based learning and teaching in EFL classrooms and the way task based activities can be designed Based on the fact that motivation plays an important role in language learning it is also necessary to concentrate on possibilities to make the English language attractive also for young learners and to help them realizing that through task based learning activities they can learn something which can be transferred to real life situations Since I did not know a lot about task based language learning and teaching I was looking forward to being engaged in this topic The most interesting and also surprising aspect that I learned was that there are so many advantages of TBL First of all TBL allows students to be free of language control because they use all their language resources rather than just practicing one preselected item Furthermore a natural context is developed from the students experiences with the language that is personalized and relevant to them Another essential advantage is the more varied exposure to language with TBL since they will be exposed to a whole range of lexical phrases collocations and patterns as well as language forms An important aspect of TBL is that the language explored arises from the students needs It is no more the decision made by the teacher or the coursebook Lastly the most important advantage in my opinion is the strong communicative approach because students spend a lot of time communicating I am sure that TBL is enjoyable and motivating for students as well as for teachers
