**Chemical Food Safety** Leon Brimer, 2011 Chemical food safety deals with all aspects of chemical risks in the food chain predominantly with the biologically active components of food additives contaminants and their toxicology Preventing the contamination of food with problematic chemical compounds requires a thorough understanding of how compounds enter and pass through the food production process in addition to toxicology and risk management Chemical Food Safety covers the underlying principles and applied science required to understand analyse and take professional action on food safety problems and questions that call for interventions at a local national or international level The text follows food contaminants through the production and processing of plant fungal algal and animal foods including oral exposure and intestinal absorption Risk assessment is explained in the context of targeted future risk management and risk communication with a view to assessing managing and communicating risk in the food chain Chemical Food Safety is ideal for higher level

students as well as those working in the food production industry consultants and national food authorities

The Technology of Cake Making A.J. Bent, E.B. Bennion, G.S.T. Bamford, 2013-03-09 The popularity of the 1973 fifth edition of The Technology of Cake Making has continued in many of the English speaking countries throughout the world This sixth edition has been comprehensively revised and brought up to date with new chapters on Cream butter and milkfat products Lactose Yeast aeration Emulsions and emulsifiers Water activity and Reduced sugar Eggs and egg products Baking fats and lower fat goods The chapters on Sugars Chemical aeration Nuts in confectionery Chocolate Pastries Nutritional value and Packaging have been completely rewritten The increased need for the continuous development of new products does not of necessity mean that new technology has to be constantly introduced Many of the good old favourites may continue to be produced for many years and they form suitable bench marks for new product development The sixth edition introduces the use of relative density to replace specific volume as a measure of the amount of aeration in a cake batter the use of relative density is in line with international agreement Specific volume is kept as a measurement of baked product volume since the industry is comfortable with the concept that subject to an upper limit an increase in specific volume coincides with improvement in cake quality

Food Biotechnology S.C. Bhatia, 2017-11-15 Today in the arena of food the primary goals of food biotechnology are to provide a more abundant less expensive and a more nutritious food supply in order to address the needs of our growing global population Today food biotechnology utilizes the knowledge of plant science and genetics to further this tradition Through the use of modern biotechnology scientists can move genes for valuable traits from one plant to another This process results in tangible environmental and economic benefits that are passed on to the farmer and the consumer This book on Food Biotechnology is divided into seven sections and contains 24 chapters and a case study The book caters to the requirement of the syllabus prescribed by various Indian universities for undergraduate and postgraduate courses in engineering It has been prepared with meticulous care aiming at making the book error free Constructive suggestions are always welcome from users of this book
