The First Crazy Word Verbs:

Multi-word Verbs in Early Modern English Claudia Claridge, 2016-10-11 The topic of this book fits in with the recently growing interest in phraseology and fixedness in English. It offers a description of multi word verbs in the language of the 17th and 18th centuries, an important formative period for Modern English. For the first time, multi word verbs are treated together as a group, as it is argued that phrasal verbs, prepositional verbs, phrasal prepositional verbs, verb adjective combinations, and verbo nominal combinations share defining characteristics. These characteristics are also reflected in similar possibilities of usage, in particular the subtle modification of verbal meaning and these verbs' potential for topicalization structures, both leading to a greater expressiveness. Using a new text collection, the Lampeter Corpus of Early Modern English Tracts 1640-1740, the study provides a description of the multi word verb types found, their syntactic behaviour, and their semantic structure. The composition of the corpus also allowed the examination of the development of these verbs over time and in different registers. The corpus study is supplemented by an investigation of attitudes towards multi word verbs with the help of contemporary works on language, leading to a more speculative discussion of the factors influencing the choice between multi word and simplex verbs.
