### Tall Building Criteria and Loading

#### ☐ BASIC CONSIDERATIONS

##### ➤ 1.2.1 General

All buildings and structures shall be designed and constructed in conformance with the provisions of this section. The buildings and portions thereof shall support all loads including dead load specified in this chapter and elsewhere in this Code. Impact, fatigue and self-straining forces shall be considered where these forces occur.

##### ➤ 1.2.2 Buildings and Structures

A structure shall ordinarily be described as an assemblage of framing members and components arranged to support both gravity and lateral forces. Structures may be classified as building and non-building structures. Structures that enclose a space and are used for various occupancies shall be called buildings or building structures. Structures other than buildings, such as water tanks, bridges, communication towers, chimneys etc. shall be called non-building structures. When used in conjunction with
