turned a corner economically It is posting increased growth rates and is no longer the world s slowest growing region Commentators are beginning to ask whether emerging from Africa is a new generation of lion economies to challenge the East Asian tigers This book goes behind the headlines to examine the conditions necessary not just for growth in Africa but for a wider business and economic transformation Contrary to neoliberal economics it argues that governments can play an important role in this through selective interventions to correct market failures and controversially that neo patrimonial governance need not be an obstacle to improved business and economic conditions Drawing on a variety of timely case studies including Rwanda Ethiopia Tanzania and Ghana this provocative book provides a radical new theory of the political and institutional conditions required for pro poor growth in Africa Tax Compliance in Tanzania Kibuta

Ongwamuhana,2011 This book examines the problem of low level tax compliance in Tanzania It proceeds from the premise that high level taxpayer compliance is essential to the success of the tax system The author argues that tax enforcement alone will not of itself lead to high level tax compliance and posits that there is a strong link between good governance and compliance He argues further that taxpayers attitudes towards taxation and towards government in general are formed in a social context including factors such as perceived fairness of the tax structure the ability of government to deliver services to

its people and the legitimacy of government
