Tapping Diverse Talent In Aviation Culture Gender And Diversity:

Tapping Diverse Talent in Aviation Mary Ann Turney, 2017-03-02 It has seldom been more critical for the aviation industry to evaluate the future employee talent pool Projected skills shortages new security concerns and the cost of training have generated a pressing need for aviation training professionals to find and develop new and diverse talent capable of safe informed and accurate communication This intelligent and topical new book provides succinct and authoritative research based information to assist decision makers plan the changes required to training facilities materials and methods and in the reinforcement and assessment of the training environment itself It will spark considerable interest among airline management personnel collegiate flight training programs military training contractors and governmental agencies and serve as a text for collegiate aviation programs and as a valuable knowledge base reference for practitioners Including comprehensive data on future world workforce composition and demographic projections for the next decade it examines the key issues of increasing cultural diversity and the measures required in the training of women and minorities Topics covered include culture and inter group relationships values and orientation in mixed crews non native English speakers gender leadership and training learning styles and preferences mentoring and role models learning style preferences and training outcomes and nonverbal communication

Gender Issues in the Sustainable Development Era Paola Paoloni, 2024-05-31 Nowadays sustainability is one of the main pillars for organizations revamp and growth Sustainability can be summarized as the set of actions based on the mutual respect of economic environmental and social interests No action should be taken unless it simultaneously respects the interests of these three spheres The 17 Sustainable Development Goals SDGs developed by the United Nations for the 2030 Agenda are moving in this direction Among them reducing diversity and strengthening women s empowerment are the main targets of Goal 5 Gender Equality This edited volume discusses three main topics Diversity Management for Sustainable Governance of Organisation Innovation and New Technologies for Sustainable Development of Enterprises Led by Women and Agri food Fashion Luxury and Made in Italy in Sustainable Female Firms

Absent Aviators Donna Bridges, Jane Neal-Smith, Albert Mills, 2016-03-16 The objective of this book is to present a number of related chapters on the subject of gender issues in the workplace of the aviation industry More specifically the chapters address the continuing shortfall in the number of women pilots in both civilian and military aviation Considerable research has been carried out on gender issues in the workplace and for example women represent about 10% of employees in engineering This example is often used to show that the consequences of gender discrimination are embedded and difficult to overcome in masculine dominated occupations However women represent only 5 6% of the profession of pilot Clearly there are many factors which mitigate women seeking to become pilots The chapters within this volume raise both theoretical and practical issues endeavouring to address the imbalance of women pilots in this occupation Absent Aviators consolidates a diverse range of issues from a number of authors from Australia Austria the United States

Canada South Africa and the United Kingdom Each of the chapters is research based and aims to present a broad picture of gender issues in aviation gendered workplaces and sociology underpinned by sound theoretical perspectives and methodologies One chapter additionally raises issues on the historical exclusion of race from an airline The book will prove to be a valuable contribution to the debates on women in masculine oriented occupations and a practical guide for the aviation industry to help overcome the looming shortfall of pilots It is also hoped it will directly encourage young women to identify and overcome the barriers to becoming a civilian or military pilot

Ethical Issues in Aviation Elizabeth

Hoppe,2016-05-13 Applied ethics has been gaining wide attention in a variety of curriculums and there is growing awareness of the need for ethical training in general Well publicized ethical problems such as the Challenger disaster the Ford Pinto case and the collapse of corporations such as Enron have highlighted the need to rethink the role of ethics in the workplace The concept of applied ethics originated in medicine with a groundbreaking book published in 1979 Business ethics books began to appear in the 1980s with engineering ethics following in the 1990s This volume now opens up a new area of applied ethics comprehensively addressing the ethical issues confronting the civil aviation industry Aviation is unique in two major ways firstly it has a long history of government regulations and secondly its primary focus is the safety of its passengers and crew For decades commercial aviation was viewed in the same manner as public utilities and thus it was highly regulated by the government Since the Deregulation Act of 1978 aviation has been viewed as any other business while other experts continue to believe that the sudden switch to deregulation has caused problems especially since many airlines were unprepared for the change Ethical Issues in Aviation focuses on current concerns and trends to reflect the changes that have occurred in this deregulated era The book provides the reader with an overview of the major themes in civil aviation ethics It begins with theoretical frameworks followed by sections on the business side of aviation employee responsibility diversity in aviation ground issues regarding airports air traffic control and security as well as health and the environment The contributors to the volume include both academics doing research in the field as well as professionals who provide accounts of the ethical situations that arise in the workplace

Ethical Issues in Aviation Elizabeth A. Hoppe,2018-10-16

The aviation industry is unique in two major ways firstly it has a long history of government involvement dating back to the early days of aviation and secondly its primary concern is the safety of its passengers and crew These features highlight the importance of ethical decision making at all levels of the industry However well publicized problems such as the disappearance of Malaysia Airlines Flight 370 highlight the need for ethics to take a more prominent role in the field Ethical Issues in Aviation focuses on both past and current topics in aviation providing the reader with an overview of the major themes in aviation ethics that cover a broad range of subjects Contributors include academics who do research in the field as well as professionals who provide first hand accounts of the ethical situations that arise in the aviation industry This second edition has been thoroughly revised throughout to bring it up to date and features several new chapters that cover recent events and topics

This book enhances student learning by providing faculty students and those interested in aviation with discussion of the most pressing ethical issues that continue to impact the industry

Training and Simulation Shem Malmquist, Dennis A. Vincenzi, Katherine Lemos, Shawn Pruchnicki, 2025-09-16 Developing training and simulation is a complex business From understanding human performance design usability and the limitations of training types to considerations with virtual reality VR producing realistic scenarios and even helping accident investigations leaves the practitioner with almost an overwhelming challenge However they know that their goal is to cut out developing methods that can train and test the sharp end professional to be ready for any eventuality whether in the air a chemical plant or the operating room Through chapters written by leading experts this book aims to address the key questions and concerns when developing training and simulation in high risk industries This book identifies unexplored challenges and weaknesses in the aviation domain including ground based training and flight simulation compared to the real world of in flight complex aircraft operations aviation accidents and incidents airspace and air traffic control aeronautical communications air navigation aircraft automation and pilot certification and testing These concerns are not just relevant to aviation however This book pushes beyond aviation to include other fields including petrochemical and medicine that while on the surface are different include some of the same human and organizational challenges It integrates machine challenges with human factors science and includes a view of the corporate influences on training Safety is a consideration in all the challenges and current limitations in training and simulation and the book is written with the intention of improving both training and safety as industries deal with more and more complex advanced technology Underpinned by case studies and real life examples this book will give the reader a thorough overview of the limitations of current training methods but with a view to improving and developing better methods for future training scenarios Opportunities and solutions are presented for current or future research and the application and incorporation of these in day day operations Training and Simulation Processes Challenges and Solutions will appeal to practitioners of human factors training pilots and ground operators engineers involved in systems design safety specialists test evaluators and accident investigators across multiple domains

Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First-Time Leaders Guah, Matthew Waritay, 2021-02-05 For hundreds of years different leadership theories have been explored to try to explain exactly how and why certain people become great leaders Research spans a discussion of personality traits the characteristics of the situation at hand and qualifications of the leader to try to determine what causes people to become more likely than others to take charge This can be in various settings CEOs presidents and prime ministers managing directors governors senators head coaches and more Through the examination of first time leadership new theories and ideas on leadership are explored The Handbook of Research on Innate Leadership Characteristics and Examinations of Successful First Time Leaders is a comprehensive reference source that focuses on what qualities distinguish first time leadership from traditional leaders while furthering leadership theories that

look at other variables such as situational factors knowledge base skill levels etc It reviews the various approaches used by first time leadership and how each of them uniquely approaches effective leadership key outcomes and the strengths and weaknesses of each approach Furthermore it distinguishes between the traditional route for leadership the gradual moving up of an individual over time to higher positions and a first time leadership in which an individual begins right away in a position without climbing the professional ladder This book will attempt to draw lessons from existing first time leadership experience and provide evidence for the appropriateness of such a route to leadership Topics highlighted include transformational leadership political leaders ethical and unethical leadership and leadership development This book is ideal for young professionals leaders executives managers graduate students practitioners government officials researchers academicians and students

Sustainability Science Per Becker, 2023-11-07 Sustainability is increasingly important across functional sectors and scientific disciplines Policy makers practitioners and academics continue to wrestle with the complexity of risk resilience and sustainability but because of the necessary transdisciplinary focus it is difficult to find authoritative content in a single source *Sustainability Science Managing Risk and Resilience for Sustainable Development Second Edition* contributes to filling that gap and is completely revised with several new chapters It asserts that all efforts for the sustainability of humankind are undermined by the four fundamental challenges of complexity uncertainty ambiguity and dynamic change While there are no silver bullets this book contends that we need systems approaches risk approaches participatory approaches and resilience approaches to address each of them and endeavours to provide such With that in mind this book describes the state of the world Part I proposes a way to approach the world Part II and suggests how to set out to change the world Part III Introduces a new agenda for sustainable development that reflects current thinking in sustainability science Draws lessons from the entire history of humankind to help us understand our present and inform decisions for our future Operationalises key concepts to provide a clear link between theory to practice Combines a stern message about staggering sustainability challenges with advice for practical action and calls for hope Includes new chapters on complexity what it is how it manifests and its consequences on resistance to knowledge and change focusing on the drivers behind the phenomena and how to overcome them and more
