

Target Berlin

John Rowland

Target Berlin:

Target Leipzig Alan Cooper, 2009-11-19 A gripping account of the RAF's attempt to destroy a Messerschmitt factory in 1944 and the carnage and confusion that unfolded on a dark winter night. Seventy-nine heavy bombers failed to return from the catastrophic raid on the industrial city of Leipzig on the night of February 19/20, 1944. Some 420 aircrew were killed and a further 131 became prisoners of war. It was at that time the RAF's most costly raid of World War II by far. The town was attacked in an attempt to destroy the Messerschmitt factory that was building the famous and deadly Bf 109 fighter. The bomber stream flew into what appeared to be a trap. It seemed that the Luftwaffe and anti-aircraft guns were aware of the intended target and waiting to pounce as soon as the bombers crossed the coast. They were subjected to constant attack by night fighters and intense flak until those aircraft that remained clawed their way home and secured relative safety over the North Sea. This book analyzes what went wrong. Espionage played a part and two bombers collided shortly after takeoff as did others as they wove their way through enemy searchlights and maneuvered violently to escape Luftwaffe night fighters. At the outset, poor navigational and meteorological briefings had hindered the bombers' attempts to locate the target and confusion reigned. The author explains the concept of this third raid on Leipzig and describes the two previous ones in October and December 1943, both of which had been deemed successes. He looks at the third raid from every angle, including the defending forces and describes the daylight raid that followed on the 20th by the USAAF. The book also includes appendices listing all RAF aircraft and crew on the raid, route maps, and many photographs.

Time on Target William R. Buster, 2015-01-13 William R. Buster, born in Harrodsburg, Kentucky, knew a soldier's combat experience and left a first-hand account of it. He graduated from West Point in 1939, just in time to serve through one of the most crucial periods in national and world history. His story includes accounts of the incredible expansion, arming, and training of the US Army, as well as his experience in the great conflict itself, from North Africa and Sicily to the hedgerow country of Normandy, the Battle of the Bulge, and on to Berlin. For his service, he received the Silver Star with Oak Leaf Cluster, the Bronze Star, the Air Medal, and the French Croix de Guerre.

Blind Bombing Norman Fine, 2019-12 Silver Medal winner in the Independent Book Publishers Awards. Late in 1939, Nazi Germany was poised to overrun Europe and extend Adolf Hitler's fascist control. At the same time, however, two British physicists invented the resonant cavity magnetron. About the size of a hockey puck, it unlocked the enormous potential of radar exclusively for the Allies. Since the discovery of radar early in the twentieth century, development across most of the world had progressed only incrementally. Germany and Japan had radar as well, but in just three years, the Allies' new radar, incorporating the top secret cavity magnetron, turned the tide of war from doubtful to a known conclusion before the enemy even figured out how. The tactical difference between the enemy's primitive radar and the Allies' new radar was similar to that between a musket and a rifle. The cavity magnetron proved to be the single most influential new invention contributing to winning the war in Europe. Norman Fine tells the relatively unknown story of radar's

transformation from a technical curiosity to a previously unimaginable offensive weapon We meet scientists and warriors critical to the story of radar and its pressure filled development and implementation Blind Bombing brings to light two characters who played an integral role in the story as it unfolded one a brilliant and opinionated scientist the other an easygoing twenty one year old caught up in the peacetime draft This unlikely pair and a handful of their cohorts pioneered a revolution in warfare They formulated new offensive tactics by trying failing and persevering ultimately overcoming the naysayers and obstructionists on their own side and finally the enemy For more information about Blind Bombing visit millwoodhouse.com **Air Force Magazine** ,2015 *Bomber Boys on Screen* S. P. MacKenzie,2019-08-08 Since the Second World War depictions of Royal Air Force operations in film and television drama have become so numerous that they make up a genre worthy of scholarly attention In this illuminating study S P MacKenzie explores the different ways in which the men of RAF Bomber Command have been represented in dramatic form on the big and small screen from the war years to the present day Bomber Boys on Screen is the first in depth study of how and why the screen drama image of those who flew those who directed them and those who provided support for RAF bomber operations has changed over time sometimes in contested circumstances Until now dramas that focus on Bomber Command have tended to be mentioned only in passing or studied in isolation despite the prevalence of surveys of both the British war film genre and of aviation cinema In Bomber Boys on Screen MacKenzie examines the development presentation and reception of significant dramas on a decade by decade basis Titles from the beginning of the war *The Lion Has Wings* 1939 to the start of new century Bomber's Moon 2014 are situated in the context of technical possibilities and limitations evolving social and cultural norms in the United Kingdom and elsewhere and the development of moral and utilitarian controversies surrounding the wartime bomber offensive directed against Nazi Germany While the focus is on feature films and television plays reference is also made to documentaries memorials veterans organizations book titles war comics and other representations of the war fought by Bomber Command

6 Group Bomber Command Chris Ward,2010-06-15 6 Group was born out of the British Commonwealth Air Training Plan BCATP which among other things called for the formation of 25 Canadian Squadrons in Britain This figure was later downsized The Canadian vision was of a Canadian force operating independently alongside Bomber Command in the manner of the American 8th but skillfull negotiating by the British resulted in Canadian Bomber squadrons operating within the RAF under RAF control but funded by Canada On the 1st of January 1943 most of the existing RCAF squadrons were brought together on stations in North Yorkshire and County Durham to form 6 Group By the end of the war 14 Squadrons were operational and one other had been posted to the Pathfinders After an uncertain beginning the Group became an efficient and valuable contributor to Bomber Command's campaigns Beginning predominantly with Wellingtons the Group was re equipped with a mixture of Halifaxes and Lancasters including the Hercules powered MkII and the Canadian built MKX *Ace in a Day* Wayne K. Rethinking Geopolitics Jeremy Black, 2024-07-02 Amid the bloody Russian invasion of Ukraine in 2021 and the escalating tensions across the Taiwan Strait the geopolitical balance of power has changed significantly in a very short period If current trends continue we may be witnessing a tectonic realignment unseen in more than a century In 1904 Halford Mackinder delivered a seminal lecture entitled The Geographical Pivot of History to a packed house at the Royal Geographical Society in London about the historic changes then taking place on the world stage Britain was the great power of that historical moment but its political military and economic primacy was under serious challenge from the United States Germany and Russia Mackinder predicted that the heartland of Eastern Europe held the key to global hegemony and that the struggle for control over this region would be the next great conflict Ten years later when an assassin's bullet in Sarajevo launched the world into a calamitous war Mackinder's analysis proved prescient As esteemed historian Jeremy Black argues in this timely new volume the 2020s may be history's next great pivot point The continued volatility of the global system in the wake of a deadly pandemic exacerbates these pressures At the same time the American public remains divided by the question of engagement with the outside world testing the limits of US postwar hegemony The time has come for a reconsideration of the 120 years from Mackinder's lecture to now as well as geopolitics of the present and of the future

The Science of Bombing Randall Thomas Wakelam, 2009-01-01 After suffering devastating losses in the early stages of the Second World War the United Kingdom's Royal Air Force established an Operational Research Section within bomber command in order to drastically improve the efficiency of bombing missions targeting Germany In The Science of Bombing Randall Wakelam explores the work of civilian scientists who found critical solutions to the navigational and target finding problems and crippling losses that initially afflicted the RAF Drawing on previously unexamined files that reassess the efficacy of strategic bombing from tactical and technical perspectives Wakelam reveals the important role scientific research and advice played in operational planning and how there existed a remarkable intellectual flexibility at Bomber Command A fascinating glimpse into military strategy and decision making The Science of Bombing will find a wide audience among those interested in air power history as well as military strategists air force personnel and aviation historians
