**The Ugandan Dairy Sub-Sector: Targeting Development Opportunities**, Targeting Regional Economic Development Stephan J. Goetz, Steven Deller, Tom Harris, 2009-03-25 Targeting regional economic development TRED has a long and rich tradition among academic economists and in the world of economic development practitioners This book builds on a series of workshops and papers organized by The Northeast Regional Center for Rural Development NERCRD at the Pennsylvania State University and the Rural Policy Research Centre RUPRI at the University of Missouri Through the coordinated efforts of NERCRD and RUPRI a network of university based researchers and Extension education specialists was developed and provides the foundation of this new edited volume For the first time in a single book Goetz Deller and Harris present an innovative approach through a collection of chapters discussing industry targeting and the relevance of TRED as an important analytical tool for practical targeting purposes The papers present issues surrounding community economic development clusters in industry and rural communities and the role of agglomeration economies The book provides the reader with insights into not only the theoretical foundations of targeting as well as empirical methods but also approaches for using the community level analysis to affect policy directions **The State's Role in Urban Economic**

House. Committee on Merchant Marine and Fisheries. Subcommittee on Oceanography, 1980 **Re-envisioning Sovereignty** Trudy Jacobsen, Professor Charles Sampford, Professor Ramesh Thakur, 2013-02-28 Sovereignty as a concept is in a state of flux In the course of the last century traditional meanings have been worn away while the limitations of sovereignty have been altered as transnational issues compete with domestic concerns for precedence This volume presents an interdisciplinary analysis of conceptions of sovereignty Divided into six overarching elements it explores a wide range of

issues that have altered the theory and practice of state sovereignty such as human rights and the use of force for human protection purposes norms relating to governance the war on terror economic globalization the natural environment and changes in strategic thinking The authors are acknowledged experts in their respective areas and discuss the contemporary meaning and relevance of sovereignty and how it relates to the constitution of international order City Choices Kenneth K. Wong,1990-07-05 *City Choices* argues that both economic concerns and political factors can be synthesized in a new framework in city policymaking This synthesis is based on a systematic empirical study of policymaking in two large cities Using numerous governmental documents and conducting extensive interviews with local state and federal officials the author examines how the two cities have implemented both federal redistributive and development programs in education and housing The author uses three models in explaining city choices economic constraint clientele participation and institutional diversity and concludes by offering his political choice perspective which identifies specific sets of local political forces that are likely to alter the city's rational choices in development and redistributive issues *Guidelines to increase the resilience of agricultural supply chains* Food and Agriculture Organization of the United Nations,2023-05-05 The effects of the COVID 19 pandemic on food and agriculture have been felt all over the world As the pandemic unfolded considerable attention began to be paid to the resilience of agricultural supply chains to COVID 19 related shocks as well as to natural and human induced shocks more generally These *Guidelines to increase the resilience of agricultural supply chains* are intended for policymakers and other stakeholders who need a broad grasp of the concepts issues and possible approaches involved Efforts to strengthen resilience to risks need to be based on a thorough analysis of the exposure and vulnerability of supply chains to them and on a cost benefit assessment of damages versus interventions In addition not all decisions can be based on commercial and economic considerations as political priorities will also play a role Governments may take the lead in setting policy priorities based on assessments of risk and resilience capacities but it is actors throughout the supply chain who are directly affected and who need to consider business strategies and interventions to be able to adapt and transform for the future Governments play an essential role by supporting the efforts of supply chain businesses and by building general resilience through establishing an appropriate policy and institutional environment and through the investments they make in physical infrastructure in putting social protection in place and in facilitating and promoting collaboration and cooperation Enhancing general resilience against future risks is important as new risks emerge and the frequency and intensity of known risks grow with climate change and increasing pressure on natural resources Financing Municipal Needs United States.
