*The Metamorphosis of Greek Cuisine* Nafsika Papacharalampous, 2023-11-10 This book is an ethnography of the metamorphosis of rural foods and traditional dishes and of the making of cuisine and identity in contemporary Athens In the wake of the financial crisis in Athens in the mid 2010s forgotten rural foods of the past are transformed into luxurious artisanal foods while traditional dishes appear reinvented in fine dining restaurants after decades of darkness How and why is this all happening in a city of poverty hardship and economic crisis Through sensory descriptions and thick ethnographic material it follows the Athenian affluent middle class in upscale delis and goes inside fine dining restaurant kitchens discussing the complex combination of cuisine tradition memory and identity revealing the cultural logic and social aspects of cuisine It demonstrates how cuisine emerges from very different often contradictory social spaces not only as an intellectual and aesthetic endeavour of chefs or as a revival of foods and foodways that link the country and the city but also as interlinked with embodied memories and embedded in social relations and commensality This book will be of great interest to scholars and students in Anthropology and Food Studies

*The Senses of Scripture* Yael Avrahami, 2012-06-15 *The Senses of Scripture* reveals the essence of biblical epistemology the ways in which ancient Israelites thought about and used their sensorium The theoretical introduction demonstrates that scholars need to liberate themselves from the Western bias that holds a pentasensory paradigm and prioritises the sense of sight The discussion of the biblical material demonstrates that biblical scholars should follow a similar path Through examination of associative and contextual patterns the author reaches a septasensory model including sight hearing speech kinaesthesia touch taste and smell It is further demonstrated that the senses according to the HB are a divinely created physical experience which symbolised human ability to act in a sovereign manner in the world Despite the lack of a biblical Hebrew term sense it seems that at times the merism sight and hearing serves that matter Finally the book discusses the longstanding dispute regarding the primacy of sight vs hearing and claims that although there is no strict sensory hierarchy evident in the text sight holds a central space in biblical epistemology

*Music, Piety, and Propaganda* Alexander J. Fisher, 2013-12-05 *Music Piety and Propaganda The Soundscapes of Counter Reformation Bavaria* explores the nature of sound as a powerful yet ambivalent force in the religious struggles that permeated Germany during the Counter Reformation Author Alexander J Fisher goes beyond a musicological treatment of composers styles and genres to examine how music and more broadly sound itself shaped the aural landscape of Bavaria as

the duchy emerged as a militant Catholic bulwark Fisher focuses particularly on the ways in which sound including bell ringing gunfire and popular song as well as cultivated polyphony not only was deployed by Catholic secular and clerical elites to shape the religious identities of Bavarian subjects but also carried the potential to challenge and undermine confessional boundaries Surviving literature archival documents and music illustrate the ways in which Bavarian authorities and their allies in the Catholic clergy and orders deployed sound to underline crucial theological differences with their Protestant antagonists notably the cults of the Virgin Mary the Eucharist and the saints Official and popular rituals like divine worship processions and pilgrimages all featured distinctive sounds and music that shaped and reflected an emerging Catholic identity Although officials imposed a severe regime of religious surveillance the Catholic state's dominance of the soundscape was hardly assured Fisher traces archival sources that show the resilience of Protestant vernacular song in Bavaria the dissemination and performance of forbidden anti Catholic songs the presence of Lutheran chorales in nominally Catholic church services into the late 16th century and the persistence of popular noise more generally Music Piety and Propaganda thus reveals historical theological and cultural issues of the period through the piercing dimension of its sounds bringing into focus the import of sound as a strategic cultural tool with significant impact on the flow of history

Nothing Personal, Just Business Howard F. Stein, 2001-06-30 Throughout the United States and indeed the world organizations have become places of darkness where emotional savagery and brutality are now commonplace and where psychological forms of violence intimidation degradation dehumanization are the norm Stein succeeds in portraying this dramatically in his evocative lucid new book and in doing so he counters official pronouncements that simply because unemployment is low and productivity high all is well Through the use of symbolism and metaphor he gives us access to the interior experience of organizational life today He employs a form of disciplined subjectivity based on Freud's concept of counter transference and other methods to help us comprehend what such dominating notions as managed social change really mean Downsizing reengineering managed care endless organizational restructuring all are presented as just business but in reality says Stein they are devastatingly personal in their effects With numerous vignettes and anecdotes drawn from his formal and informal research Dr Stein shows us in often horrifying detail what work has come to be in so many of these dark places but also what must happen and can happen to lift them into the light Through consultations observation and personal experience Stein documents the ordinary assaults on the human spirit a form of violence in the workplace that usually escapes common classification By that he means culturally sanctioned violence such as everyday forms of intimidation ridicule goading and doubling of workloads all in an asserted effort to make the workplace more productive more competitive His examples metaphors symbols images come from the Holocaust and the Vietnam War and refer back to other horrors in other times the Crusades and the Spanish Inquisition among them His book demonstrates precisely how brutal so many of our rational business practices have become and how disposable all of us ultimately are at all levels in all organizations Stein draws upon

a variety of research techniques including a form of counter transference based on Freud's concept to understand the inner meanings and feelings contained in workplace metaphors and symbols An incisive foreword by Dr David B Friedman Associate Clinical Professor of Psychiatry at the New York University School of Medicine comments on this puts the book in perspective and offers additional insights into Stein's themes and how brilliantly he develops them Routledge International Handbook of Food Studies Ken Albala, 2013-05-07 Over the past decade there has been a remarkable flowering of interest in food and nutrition both within the popular media and in academia Scholars are increasingly using foodways food systems and eating habits as a new unit of analysis within their own disciplines and students are rushing into classes and formal degree programs focused on food Introduced by the editor and including original articles by over thirty leading food scholars from around the world the Routledge International Handbook of Food Studies offers students scholars and all those interested in food related research a one stop easy to use reference guide Each article includes a brief history of food research within a discipline or on a particular topic a discussion of research methodologies and ideological or theoretical positions resources for research including archives grants and fellowship opportunities as well as suggestions for further study Each entry also explains the logistics of succeeding as a student and professional in food studies This clear direct Handbook will appeal to those hoping to start a career in academic food studies as well as those hoping to shift their research to a food related project Strongly interdisciplinary this work will be of interest to students and scholars throughout the social sciences and humanities

Nazarea, Terese Gagnon, 2021-06-01 *Moveable Gardens* explores how biodiversity and food can counter the alienation caused by displacement By offering in depth studies on a variety of regions this volume carefully considers various forms of sanctuary making within communities and seeks to address how carrying seeds plants and other traveling companions is an ongoing response to the grave conditions of

displacement in today's world. The destruction of homelands, fragmentation of habitats and post-capitalist conditions of modernity are countered by thoughtful remembrance of tradition and the migration of seeds which are embodied in gardening, cooking and community building. *Moveable Gardens* highlights itineraries and sanctuaries in an era of massive dislocation, addressing concerns about finding comforting and familiar refuges in the Anthropocene. The worlds of marginalized individuals who live in impoverished rural communities, many Indigenous peoples and refugees are constantly under threat of fracturing. Yet in every case there is resilience and regeneration as these individuals re-create their worlds through the foods, traditions and plants they carry with them into their new realities. This volume offers a new understanding of the performances and routines of sociality in the face of daunting market forces and perilous climate transformations. These traditions sustained our ancestors and they may suffice to secure a more meaningful, diverse future. By delving into the nature of nostalgia, burrowing into memory and knowledge and embracing the specific wonders of each deeply rooted or newly displaced community, endlessly valuable ways of being and understanding can be preserved.
