Nutrition Michael J. Gibney,Barrie M. Margetts,John M. Kearney,Lenore Arab,2013-03-19 As an academic subject nutrition has grown enormously in recent years and with it the need for specialist textbooks on the subject In response to this need a decision was taken by The Nutrition Society to produce a ground breaking series of four textbooks of which Public Health Nutrition is the third The books in the series Provide students with the required scientific basis in nutrition in the context of a systems and health approach Enable teachers and students to explore the core principles of nutrition and to apply these throughout their training to foster critical thinking at all times Each chapter identifies the key areas of knowledge that must be understood and also the key points of critical thought that must accompany the acquisition of this knowledge Are fully peer reviewed to ensure completeness and clarity of content as well as to ensure that each book takes a global perspective and is applicable for use by nutritionists and on nutrition courses throughout the world Public Health Nutrition is an essential purchase for students majoring in nutrition and dietetics Public health nutrition as a subject is growing immensely in importance taking into account the real potential to reduce the burden of non communicable chronic disease through diet Professionals in nutrition dietetics food science medicine community health care and many related health care areas will all find much of great use within the book s covers Libraries in all universities medical schools and establishments teaching and researching in these subject areas should have several copies on their shelves OTHER BOOKS IN THE NUTRITION SOCIETY TEXT BOOK SERIES Introduction to Human Nutrition ISBN 0 632 05624 X Nutrition Metabolism ISBN 0 632 05625 8 Clinical Nutrition ISBN 0 632 05626 6 **Snack Food** R. Gordon Booth,2012-12-06 Rather than containing for the most part fairly detailed food science and technology intended for daily use and reference by food scientists and technologists this book is designed for use by a much wider range of readers concerned with a particular and rapidly expanding area of food production promotion marketing and packaging A certain amount of basic detail is provided to enable relatively rough estimates of the production methods and packaging facilities necessary to enable new or improved items to be made but the overall emphasis is on the wide range of food products that can now quite legitimately be regarded as coming within the

broad definition of foods used as snacks as contrasted with main meals Thus we start with the basic requirements to be met in a snack food whatever its nature and follow with the great variety of items nowadays used 3 l snacks or as adjuvants to snacks concluding with an assessment of nutritional consequences of the growth of snacking or browsing and with the special packaging requirements of snack foods
