Social Change Through Voluntary Action:

Leisure, Voluntary Action and Social Change in Britain, 1880-1939 Robert Snape, 2018-04-05 In the final decades of the nineteenth century modernizing interpretations of leisure became of interest to social policy makers and cultural critics producing a discourse of leisure and voluntarism that flourished until the Second World War The free time of British citizens was increasingly seen as a sphere of social citizenship and community building Through major social thinkers including William Morris Thomas Hill Green Bernard Bosanquet and John Hobson leisure and voluntarism were theorized in terms of the good society In post First World War social reconstruction these writers remained influential as leisure became a field of social service directed towards a new society and working through voluntary association in civic societies settlements new estate community centres village halls and church based communities This volume documents the parallel cultural shift from charitable philanthropy to social service and from rational recreation to leisure teasing out intellectual influences which included social idealism liberalism and socialism Leisure Robert Snape claims has been a central and under recognized organizing force in British communities *Leisure Voluntary Action and Social Change in Britain 1880 1939* marks a much needed addition to the historiography of leisure and an antidote to the widely misunderstood implications of leisure to social policy today

Continuity and Change in Voluntary Action Rose Lindsey, John Mohan, 2018-05-30 There are great expectations of voluntary action in contemporary Britain but limited in depth insight into the level distribution and understanding of what constitutes voluntary activity Drawing on extensive survey data and written accounts of citizen engagement this book charts change and continuity in voluntary activity since 1981 How voluntary action has been defined and measured is considered alongside individuals accounts of their participation and engagement in volunteering over their lifecourses Addressing fundamental questions such as whether the public are cynical about or receptive to calls for greater voluntary action the book considers whether respective government expectations of volunteering can really be fulfilled Is Britain really a shared society or a big society and what is the scope for expansion of voluntary effort This pioneering study combines rich qualitative material from the Mass Observation Archive between 1981 and 2012 and data from many longitudinal and cross sectional social surveys Part of the Third Sector Research Series this book is informed by research undertaken at the Third Sector Research Centre funded by the Economic and Social Research Council and Barrow Cadbury Trust

Making the Nonprofit Sector in the United States David C. Hammack, 1998-12-22. It is a delight to see an anthology on nonprofit history done so well. Barry Karl, John F. Kennedy School of Government, Harvard University. This is a volume that everyone concerned about nonprofits, scholar, practitioner, and citizen will find useful and illuminating. Peter Dobkin Hall, Program on Non-Profit Organizations, Yale Divinity School. A remarkable book. Robert Putnam, John F. Kennedy School of Government, Harvard University. One to come from John Simon School of Law, Yale University. By Jan 13th and others are being solicited. Unique among nations, America conducts almost all of its formally organized religious activity and many cultural, arts, human service, educational, and research activities through private nonprofit organizations. Though partially funded by government as well as by fees and donations, American nonprofits have pursued their missions with considerable independence. Many have amassed remarkable resources and acquired some of the most impressive hospitals, universities, performing arts, and museum facilities in the world. While some have amassed large endowments, many that surpass one billion dollars, there are also hundreds of thousands of small nonprofits, most with no tangible resources at all. How did the United States come to rely so heavily on nonprofits? Why has it continued to do so? What purposes do Americans seek to advance through nonprofits? How have Americans sought to control them? How have nonprofits been affected by the growth of government in the twentieth century? These questions suggest the complexity of the history of nonprofits in the United States. To help explore that history, this reader presents some of the classic documents in the development of the nonprofit sector along with important interpretations by recent scholars. The selections can be considered a representative part of a single extended conversation by the men and women who have taken part in the effort to define America and the American dream, even as they shaped what we now call the nonprofit sector. The statements by participants in the growth and development of the nonprofit sector are accompanied by essays written by historians and social scientists that provide concise surveys of important issues and periods. The essays give voice to those whose contributions to the American debate about voluntary associations and private institutions would otherwise be difficult to find or comprehend. Rochester,2013-11-20 Volunteering and voluntary organizations have become increasingly important in British social and political life but at a cost Greater prominence has led to a narrow and distorted view of what voluntary action involves and how it is undertaken This book reasserts the case for a broader view of voluntarism as a unique set of autonomous activities

Grassroots Development Initiatives in India Sampat Kale,2023-12-01 This book examines how the voluntary organisations engaged with development programmes work with the approach of conscientisation to empower Adivasis Their work has been instrumental in making government machinery pro poor by implementing development programmes with greater transparency and accountability Conscientisation of Adivasis by voluntary organisations through their educative role has resulted in the advancement of their lives and the emergence of autonomous leadership The study concludes that the ideological base of the founders of the organisations made the Adivasis independent and self supportive for their development from their earlier status of servitude through initiating and accomplishing the task of conscientisation This title is co published with Aakar Books Print editions not for sale in South Asia India Sri Lanka Nepal Bangladesh Pakistan and Bhutan Non-market Entrepreneurship G.
