Workshop on Stochastic Modelling in Biology: Relevant Mathematical Concepts and Recent Applications, Heidelberg, August 8-12, 1988 Petre Tăutu, 1990 These proceedings focus on future prospects as well as on the present status in some important areas of applied probability and mathematical biology Some papers have educational intentions regarding the mathematical modelling of special biological situations The workshop was the third one in Heidelberg dealing with stochastic modelling in biology e.g. cell biology, embryology, oncology, epidemiology and genetics **Stochastic Methods in Biology** Motoo Kimura, Gopinath Kallianpur, Takeyuki Hida, 2013-03-13 The use of probabilistic methods in the biological sciences has been so well established by now that mathematical biology is regarded by many as a distinct discipline with its own repertoire of techniques The purpose of the Workshop on stochastic methods in biology held at Nagoya University during the week of July 8-12 1985 was to enable biologists and probabilists from Japan and the U.S. to discuss the latest developments in their respective fields and to exchange ideas on the applicability of the more recent developments in stochastic process theory to problems in biology Eighteen papers were presented at the Workshop and have been grouped under the following headings I Population genetics five papers II Measure valued diffusion processes related to population genetics three papers III Neurophysiology two papers IV Fluctuation in living cells two papers V Mathematical methods related to other problems in biology epidemiology population dynamics etc six papers An important feature of the Workshop and one of the reasons for organizing it has been the fact that the theory of stochastic differential equations SDEs has found a rich source of new problems in the fields of population genetics and neurobiology This is especially so for the relatively new and growing area of infinite dimensional i.e. measure valued or distribution valued SDEs The papers in II and III and some of the papers in the remaining categories represent these areas
