Fife, 2017-08-11 Losing your eyesight is a frightening thought Yet every five seconds someone in the world goes blind Most causes of visual impairment are caused by age related diseases such as cataracts glaucoma macular degeneration and diabetic retinopathy Modern medicine has no cure for these conditions Treatment usually involves managing the symptoms and attempting to slow the progression of the disease In some cases surgery is an option but there is always the danger of adverse side effects that can damage the eyes even further Most chronic progressive eye disorders are considered incurable hopeless However there is a successful treatment It doesn t involve surgery drugs or invasive medical procedures All that is needed is a proper diet The key to this diet is coconut specifically coconut oil The author used this method to cure his own glaucoma something standard medical therapy is unable to do The coconut based dietary program described in this book has the potential to help prevent and treat many common visual problems including the following Cataracts Glaucoma Macular degeneration Diabetic retinopathy Dry eye syndrome Sjogren s syndrome Optic neuritis Irritated eyes Conjunctivitis pink eye Stroke Eye disorders related to neurodegenerative disease Alzheimer s Parkinson s MS Most chronic eye disorders come without warning No one can tell who will develop a visual handicap as they age Everybody is at risk Once the disease is present treatment is a lifelong process The best solution is prevention In this book you will learn the basic underlying causes

capacity to enjoy life well into your old age is sometimes denied by all kinds of degenerative diseases. The result is that most people suffer from these diseases and die prematurely while knowledge of how to prevent or cure their condition already exists. **Nanoethics** Donal P. O'Mathuna, 2010-06-01 Nanotechnology manipulates matter at the atomic level. It leads to innovative processes and products that are revolutionizing many areas of modern life. Huge amounts of public funds are being invested in the science, yet the public has little understanding of the technology or its ethical implications. Indeed the ethical, social and political dimensions of nanotechnology are only beginning to receive the attention they require outside of science fiction contexts. Surveillance devices may become so small that they are practically invisible to the naked eye, raising concerns about privacy. Nanomedicine may lead to the development of new diagnostic and therapeutic devices, yet anxieties have been raised about the impact of nanobots circulating in our bodies. Military applications or misuses of nanotechnology raise other concerns. This book explores in an accessible and informative way how nanotechnology is likely to impact the lives of ordinary people in the coming years and why ethical reflection on nanotechnology is needed now.
