history into undergraduate mathematics teaching Lectures and Surveys on G2-Manifolds and Related Topics Spiro Karigiannis, Naichung Conan Leung, Jason D. Lotay, 2020-05-26 This book one of the first on G2 manifolds in decades collects introductory lectures and survey articles largely based on talks given at a workshop held at the Fields Institute in August 2017 as part of the major thematic program on geometric analysis. It provides an accessible introduction to various aspects of the geometry of G2 manifolds including the construction of examples as well as the intimate relations with calibrated geometry Yang Mills gauge theory and geometric flows. It also features the inclusion of a survey on the new topological and analytic invariants of G2 manifolds that have been recently discovered. The first half of the book consisting of several introductory lectures is aimed at experienced graduate students or early career researchers in geometry and topology who wish to familiarize themselves with this burgeoning field. The second half consisting of numerous survey articles is intended to be useful to both beginners and experts in the field

Modeling, Analysis, and Visualization of Anisotropy Thomas Schultz, Evren Özarslan, Ingrid

Hotz, 2017-10-14 This book focuses on the modeling processing and visualization of anisotropy irrespective of the context in which it emerges using state of the art mathematical tools. As such it differs substantially from conventional reference works which are centered on a particular application. It covers the following topics i the geometric structure of tensors ii statistical methods for tensor field processing iii challenges in mapping neural connectivity and structural mechanics iv processing of uncertainty and v visualizing higher order representations. In addition to original research contributions it provides insightful reviews. This multidisciplinary book is the sixth in a series that aims to foster scientific exchange between communities employing tensors and other higher order representations of directionally dependent data. A significant number of the chapters were co authored by the participants of the workshop titled Multidisciplinary Approaches to Multivalued Data Modeling Visualization Analysis which was held in Dagstuhl Germany in April 2016. It offers a valuable resource for those working in the field of multi directional data vital inspirations for the development of new models and essential analysis and visualization techniques thus furthering the state of the art in studies involving anisotropy

Bulletin of Marquette University, 1925 **John Norden's The Surveyor's Dialogue (1618)** Mark Netzloff, 2016-05-06 This edition provides the first complete modern version of John Norden's The Surveyor's Dialogue. Norden's text a series of dialogues between a fictional surveyor and several interlocutors including a tenant farmer an aristocrat landowner a manorial officer and a socially mobile land buyer is remarkable for its unique commentary on the agrarian roots of English capitalism. In his extensive introduction Mark Netzloff situates the text in relation to a number of early modern contexts. He discusses the use of dialogue and other literary forms in proto scientific writing and the role of print in the increasing professionalism of early surveyors. Netzloff also examines the impact of capital formation on agrarian and manorial class relations discussing topics

such as popular protest and revolt cottagers and the rural poor regionalism and urbanization and the transformation of the natural environment through deforestation enclosure and the appropriation of commons Alongside a thorough annotation of technical and historical terms the edition provides a list of textual variants among early modern versions of the text This critical edition of The Surveyor s Dialogue constitutes an important contribution to early modern scholarship and it will be invaluable to scholars from a range of fields including the history of science economic and agrarian history and literary and cultural studies
