Prehistoric Britain Ann Woodward,J. D. Hill,2017-01-31 Pottery has become one of the major categories of artifact that is used in reconstructing the lives and habits of prehistoric people In these 14 papers members of the Prehistoric Ceramics Research Group discuss the many ways in which pottery is used to study chronology behavioral changes interrelationships between people and between people and their environment technology and production exchange settlement organization cultural expression style and symbolism      **Proceedings of the Prehistoric Society of East Anglia** ,1918      Collared Urns of the Bronze Age in Great Britain and Ireland Ian H. Longworth,1984      **The Prehistoric Settlement of Britain** Richard Bradley,2014-10-24 This study first published in 1978 explores the evidence for pre Roman settlement in Britain Four aspects of the prehistoric economy are described by the author colonisation and clearance arable and pastoral farming transhumance and nomadism and hunting gathering and fishing These aspects have been brought together to formulate a structure which contains the evidence more naturally than chronological schemes that depend on assumed changes in population or technology The book draws upon environmental evidence and recent developments in archaeological fieldwork It also provides an extensive exploration of the published literature on the subject and the scope of the evidence Originally conceived as an ideas book rather than a final synthesis the author s intention throughout is to stimulate argument and research and not to replace one dogma with another      **The British Palaeolithic** Paul Pettitt,Mark White,2012 The British Palaeolithic provides the first academic synthesis of the entire British Palaeolithic from the earliest occupation to the end of the Ice Age It fills a major gap in teaching resources as well in research by providing a current synthesis of the latest research on the period      **The British Lower Palaeolithic** John McNabb,2011-03-17 Taking as its central theme the issue of whether early Hominins organized themselves into societies as we understand them John McNabb looks at how modern researchers recognize such archaeological cultures He examines the existence of a stone tool culture called the Clactonian to introduce the multidisciplinary nature of the subject In analyzing the various kinds of data archaeologists would use to investigate the existence of a Palaeolithic culture this book represents the latest research in archaeology population dispersals geology climatology human palaeontology evolutionary psychology environmental and biological disciplines and dating techniques along with many other research methods      A Survey of the Prehistory of the Farnham District (Surrey)

K. P. Oakley, W. F. Rankine, A. W. G. Lowther, A. Keiller, S. Piggott, 1939      **Neolithic Stone Extraction in Britain and Europe** Peter Topping, 2021-12-08 This book focuses on the introduction of Neolithic extraction practices across Europe through to the Atlantic periphery of Britain and Ireland The key research questions are when and why were these practices adopted and what role did extraction sites play in Neolithic society Neolithic mines and quarries have frequently been seen as fulfilling roles linked to the expansion of the Neolithic economy However this ignores the fact that many communities chose to selectively dig for certain types of stone in preference to others and why the products from these sites were generally deposited in special places such as wetlands To address this question 168 near global ethnographic studies were analyzed to identify common trends in traditional extraction practices to produce robust statistics about their motivations and material signatures Repeated associations emerged between storied locations the organization of extraction practices long distance distribution of products and the material evidence such activities left behind This suggests that we can now probably identify mythologized storied sites seasonality ritualized extraction and the use life of extraction site products The ethnographic model was tested against data from 223 near global archaeological extraction sites which confirmed a similar patterning in both material records It was used to analyze the social context of 79 Neolithic flint mine and 51 axe quarry excavations in Britain and Ireland and to review their European origins The evidence that emerges confirms the pivotal role played by Neolithic extraction practices in European Neolithization and that the interaction of indigenous foragers with migrant miners farmers was fundamental to the adoption of the new agropastoral lifestyle      **A Survey of the Prehistory of Farnham District (Surrey)** , 1939      **The Iron Age in Lowland Britain** D.W. Harding, 2014-11-13 This book was written at a time when the older conventional diffusionist view of prehistory largely associated with the work of V Gordon Childe was under rigorous scrutiny from British prehistorians who still nevertheless regarded the Arras culture of eastern Yorkshire and the Belgic cemeteries of south eastern Britain as the product of immigrants from continental Europe Sympathetic to the idea of population mobility as one mechanism for cultural innovation as widely recognized historically it nevertheless attempted a critical re appraisal of the southern British Iron Age in its continental context Subsequent fashion in later prehistoric studies has favoured economic social and cognitive approaches and the cultural historical framework has largely been superseded Routine use of radiocarbon dating and other science based applications and new field data resulting from developer led archaeology have revolutionized understanding of the British Iron Age and once again raised issues of its relationship to continental Europe      **Late Roman Dorset Black-Burnished Ware (BB1)** Malcolm Lyne, 2022-03-10 Much has been written about Roman Dorset Black Burnished Ware BB1 and its Late Iron Age Durotrigian origins since the industry was first recognised at the end of the 1960s However this has mostly focused on the forms produced and distributed during the 1st to 3rd centuries This publication covers those of the late 3rd to early 5th century      *Surrey Archaeological Collections* Surrey Archaeological Society, 1965      *A Story of Maine in 112 Objects: From Prehistory to Modern Times*

Bernard P. Fishman, 2019-04-04 Founded in 1836 the Maine State Museum is America's oldest state museum and is known to many as Maine's Smithsonian because of the breadth and diversity of its holdings nearly a million objects covering every aspect of the state's cultural biological and geological history and the thousands of stories its collections tell For this book the museum selected and photographed 112 artifacts and specimens that together tell an epic story of the land and its people from prehistoric times to the present It is a story covering 395 million years a story told with a walrus skull and fossils tourmaline and spear points mammoth tusks and bone fishhooks Norse coins and caulking irons militia flags and survey stakes treaty documents and wooden tankards a temperance banner and a locomotive Joshua Chamberlain's pistol and a cod tub trawl a Lombard log hauler and a woman's WWII welding outfit L L Bean boots and German POW snowshoes and many more objects from the museum's collections Short narratives written by museum curators are woven around each item including photos of related objects and the ensemble has been honed polished and introduced by museum director Bernard Fishman This is a book that historians and Maine residents and visitors will delve into again and again unearthing new treasures with each reading

**Iconoclasm and Later Prehistory** Henry Chapman, 2018-02-07 Iconoclasm or the destruction of images and other symbols is a subject that has significant resonance today Traditionally focusing on examples such as those from late Antiquity Byzantium the Protestant Reformation and the French Revolution iconoclasm implies intentioned attacks that reflect religious or political motivations However the evidence highlights considerable variation in intentionality the types and levels of destruction and the targets attacked Such variation has been highlighted in recent iconoclasm scholarship and this has resulted in new theoretical frameworks for its study This book presents the first analysis of iconoclasm for prehistoric periods Through an examination of the themes of objects the human body monuments and landscapes the book demonstrates how the application of the approaches developed within iconoclasm studies can enrich our understanding of earlier periods in addition to identifying specific events that may be categorised as iconoclastic Iconoclasm and Later Prehistory combines approaches from two distinct disciplinary perspectives It presents a new interpretative framework for prehistorians and archaeologists whilst also providing new case studies and significantly extending the period of interest for readers interested in iconoclasm

**The Lower and Middle Palaeolithic Periods in Britain** Derek A. Roe, 2014-10-30 This book deals with the earliest period of human settlement in Britain proposing a series of archaeological stages for the Lower and Middle Palaeolithic periods An introduction on the problems and methods of studying the Palaeolithic and Pleistocene periods leads into the technical argument a sequence of development derived from evidence of stone artefacts and other signs of human activity at stratified sites in south east England Materials from all occupied parts of Britain are related to this basic sequence and stressing that Britain lay on the edge of the Palaeolithic world the author also brings in essential evidence from Europe and farther afield The final chapter suggests the probable way of life of human groups in this period This broad survey synthesises material from widely scattered sources including museums from all over

Britain and has an extensive bibliography Originally published in 1981 Bronze Age Landscapes Joanna Bruck, 2002-02-01

This volume is a collection of essays which exemplify the range and diversity of work currently being undertaken on the regional landscapes of the British Bronze Age and the progress which has been made in both theoretical and interpretive debate Together these papers reflect the vibrancy of current research and promote a closer marriage of landscape site and material culture studies
