Can survey design reduce anchoring bias in recall data? Evidence from Malawi Godlonton, Susan,Hernandez, Manuel A.,Paz, Cynthia,2021-11-04 Recall biases in retrospective survey data are widely considered to be pervasive and have important implications for effective agricultural research In this paper we leverage the survey design literature and test three strategies to attenuate mental anchoring in retrospective data collection question order effects retrieval cues and aggregate community anchoring We embed a survey design experiment in a longitudinal survey of smallholder farmers in Malawi and focus on anchoring bias in maize production and happiness exploiting differences between recalled and concurrent responses We find that asking for retrospective data before concurrent data reduces recall bias by approximately 34% for maize production a meaningful improvement with no increase in survey data collection costs Retrieval cues are less successful in reducing the bias for maize reports and involve more data collection time while community anchors can exacerbate the bias Reversing the order of questions and retrieval cues do not help to ease the bias for happiness reports

OECD Economic Surveys: Mexico 2011 OECD,2011-05-17 The 2011 edition of OECD s periodic economic survey of Mexico This edition includes chapters on macroeconomic and structural policies fiscal reform structural reforms in regulatory competition and education policies and informality

A Survey of Sustainable Development Jonathan Harris,Timothy Wise,Kevin Gallagher,Neva R. Goodwin,2013-04-16 Perpetual economic growth is physically impossible on a planet with finite resources Many concerned with humanity s future have focused on the concept of sustainable development as an alternative as they seek means of achieving current economic and social goals without compromising the ability of future generations to meet their own goals Sustainable development brings together elements of economics public policy sociology ecology resource management and other related areas and while the term has become quite popular it is rarely defined and even less often is it understood *A Survey of Sustainable Development* addresses that problem by bringing together in a single volume the most important works on sustainable human and economic development It offers a broad overview of the subject and gives the reader a quick and thorough guide to this highly diffuse topic The volume offers ten sections on topics including economic and social dimensions of sustainable development the North South balance population and the demographic transition agriculture and renewable resources energy and materials use globalization and corporate responsibility local and national strategies Each section is introduced with an essay by one of the volume editors that provides an overview of the subject and a summary of the mainstream literature followed by two to three page abstracts of the most important articles or book chapters on the topic *A Survey of Sustainable Development* is the sixth and final volume in the *Frontier Issues of Economic Thought* series produced by the Global Development And Environment Institute at Tufts

University Each book brings together the most important articles and book chapters in a frontier area of economics where important new work is being done but has not yet been incorporated into the mainstream of economic study The book is an essential reference for students and scholars concerned with economics environmental studies public policy and administration international development and a broad range of related fields **Development Economics** Subrata Ghatak, University of Leicester. Department of Economics, 1990 **Development Economics and Social Justice** John Thoburn, 2017-11-28 Professor Ian Livingstone is one of a small group of British development economists who have achieved international renown and recognition The objective of this book is to pay tribute to his life's work particularly those aspects which related to key but challenging development issues These issues include at a broad level the understanding of the economic forces determining the development of low income economies more detailed micro work on agricultural development irrigation in particular decentralisation and local government finance small scale enterprises and large scale manufacturing development Themes running through his work relate to his over riding concern for rigour and for socio economic justice Ian Livingstone consistently used the traditional tools of economic analysis as a means to increase understanding of development issues in a way which was itself just as radical as the contributions of political scientists and sociologists This volume has been produced with similar aims
