Women and the Birth of Russian Capitalism Irina Mukhina, 2014-07-15 Little has been known acknowledged or studied about the shuttle trade one of the major manifestations of new Russian life of the 1990s The term itself seems to suggest something of a rather small scale Indeed the amount of each transaction in this trade was miniscule Individual peddlers traveled to near abroad with their bulging bags and brought back home for resale only as many goods as they could personally carry in their enormous suitcases The phenomenon hidden behind the term shuttle trade was by no means insignificant or small in scale By the mid 1990s it constituted the backbone of Russian consumer trade and was a substantial source of revenue The primary participants in the shuttle trade were women and in this enlightening study Mukhina assesses the reasons why women were attracted to this business the range of the personal experiences of female shuttle traders and the social impact of women s involvement in this sort of economic activity By analyzing the social and gendered dimensions of the shuttle trade the reader can begin to understand more broadly how gender shaped the transition period associated with the end of communist regimes in Eastern Europe Moreover the difficulties that these women faced highlight the gap between the rhetoric of free market economy and the actual market practices These women traders had to create and shape the physical market an open air space for their goods without the basic legislative and other provisions of market economies The shuttle trade became an avenue of female suffering but also of survival and even empowerment during the time that most Russians now call the wild 1990s

Rise and Fall of Soviet Communism , **A Market Out of Place?** Pernille Hohnen, 2003 Pernille Hohnen has written a detailed ethnography of a Lithuanian market place in the mid 1990s and as such contributes significantly to the understanding of a phenomenon largely unaccounted for by anthropologists namely shuttle trading and a new form of transnationalism connected to the numerous outdoor markets that were established all over Eastern and Central Europe during the 1990s most of which still flourish Traders go as far as China India Turkey and Poland and bring back items for local consumption as well as for retail not only within the country but throughout the region The global extension of the local market is astonishing not least on account of the personal ingenuity invested in an uncertain business where one can only learn the hard way Furthermore by combining a synchronic analysis of the market with an analysis of changing trading practices during the crucial 10 year period of the 1990s the book sheds important light on processes of creativity and venture as well as on the more gradual institutionalization of trading practices such as trade routes trading routines technology and forms of political control Both traders and their environment tend to evaluate the market place as somehow outside civilized society The disorderly nature of the market epitomizes contested social hierarchies and cultural categories as well as privatized power relations in the form of racketeers which slowly gain legitimacy The analysis of the market place sheds light on changing discourses of ethnicity gender and work in Lithuanian
