Survival Is Not Enough Shift Happens:

Survival Is Not Enough Seth Godin, 2012-12-11 Everything in our world from marketing to technology to distribution to the capital markets is moving at a faster pace than ever Yet most companies view change as a threat and survival as the goal This book transforms all that It contains a simple yet revolutionary idea we can evolve our companies the same way nature evolves a species Evolution is a fundamental force of nature and Seth Godin demonstrates how it can be put to work in any organisation The first step is to eliminate the anti change reflex that s genetically coded into all of us Once a company learns to zoom to change without panicking it is much more likely to evolve And a company that evolves can become ever more profitable For the last five years bestselling author Seth Godin has repeatedly demonstrated the power of his books by living their advice He used the tactics in PERMISSION MARKETING to drive the book up the bestseller list He followed the advice of UNLEASHING THE IDEA VIRUS to turn his treatise into a living example of an ideavirus Now as a committed zoomer he shows his legions of fans how to turn their company into one that can zoom from one change to another It s a formula for success whether the market is up or down whether technology is hot or not in all industries from retail to tech to services

The New Science of Consciousness Survival and the Metaparadigm Shift to a Conscious Universe Dr. Alan Ross Huguenot, 2016-06-30 Alan Huguenot lectures on the Leading Edge Science of the Afterlife he concluded that the entire universe is conscious and that this explains both near death experiences and certain paradoxes of quantum theory As someone with a physics degree I know that Huguenot's basic idea of a conscious universe is neither crazy nor new Erwin Schrödinger one of the fathers of quantum physics was an avid student of Hindu philosophy and believed something similar Gideon Lichfield April 2015 Atlantic Monthly The existence of a hidden field Bohm's implicate order of non physical consciousness occupying as yet undiscerned additional dimensions which are outside the visible reality Bohm's explicate order as defined by 3 D plus time has now been proven scientifically by the following collated data Recent repeated replication of John Bell's theory of non locality Studies of the Near Death experience and After death communications demonstrated in triple blind laboratory experiments testing evidential mediumship This hidden field implicate order of non physical consciousness also provides the matrix upon which the explicate order of observed reality is continually manifested Alan Huguenot Our challenge is to discover through careful science how we can interface with this matrix of consciousness Viewing psi phenomena as belonging to aspects of reality about which we as yet simply know very little is the only honest way for any scientist to proceed Healthy scientific skepticism must be open to new discoveries and so allow open examination of the scientific data developed by rigorous para normal research Honest open minded inquiry will bring both new discoveries of truth and new laws of physics beyond the limits of the Newtonian paradigm Alan Huguenot

Impact! Gerrit L. Verschuur, 1997-12-18 Most scientists now agree that some sixty five million years ago an immense comet slammed into the Yucatan detonating a blast twenty million times more powerful than the largest hydrogen bomb punching a hole ten miles deep in the earth Trillions of tons of rock were vaporized and launched into the atmosphere For a thousand miles in all directions vegetation burst into flames There were tremendous blast waves searing winds showers of molten matter from the sky earthquakes and a terrible darkness that cut out sunlight for a year enveloping the planet in freezing cold Thousands of species of plants and animals were obliterated including the dinosaurs some of which may have become extinct in a matter of hours In *Impact* Gerrit L Verschuur offers an eye opening look at such catastrophic collisions with our planet Perhaps more important he paints an unsettling portrait of the possibility of new collisions with earth exploring potential threats to our planet and describing what scientists are doing right now to prepare for this awful possibility Every day something from space hits our planet Verschuur reveals In fact about 10 000 tons of space debris fall to earth every year mostly in meteoric form The author recounts spectacular recent sightings such as over Allende Mexico in 1969 when a fireball showered the region with four tons of fragments and the twenty six pound meteor that went through the trunk of a red Chevy Malibu in Peekskill New York in 1992 the meteor was subsequently sold for 69 000 and the car itself fetched 10 000 But meteors are not the greatest threat to life on earth the author points out The major threats are asteroids and comets The reader discovers that astronomers have located some 350 NEAs Near Earth Asteroids objects whose orbits cross the orbit of the earth the largest of which are 1627 Ivar 6 kilometers wide and 1580 Betula 8 kilometers Indeed we learn that in 1989 a bus sized asteroid called Asclepius missed our planet by 650 000 kilometers a mere six hours and that in 1994 a sixty foot object passed within 180 000 kilometers half the distance to the moon Comets of course are even more deadly Verschuur provides a gripping description of the small comet that exploded in the atmosphere above the Tunguska River valley in Siberia in 1908

in a blinding flash visible for several thousand miles every tree within sixty miles of ground zero was flattened He discusses Comet Swift Tuttle the most dangerous object in the solar system a comet far larger than the one that killed off the dinosaurs due to pass through earth s orbit in the year 2126 And he recounts the collision of Comet Shoemaker Levy 9 with Jupiter in 1994 as some twenty cometary fragments struck the giant planet over the course of several days casting titanic plumes out into space when Fragment G hit it outshone the planet on the infrared band and left a dark area at the impact site larger than the Great Red Spot In addition the author describes the efforts of Spacewatch and other groups to locate NEAs and evaluates the idea that comet and asteroid impacts have been an underrated factor in the evolution of life on earth Astronomer Herbert Howe observed in 1897 While there are not definite data to reason from it is believed that an encounter with the nucleus of one of the largest comets is not to be desired As Verschuur shows in Impact we now have substantial data with which to support Howe s tongue in cheek remark Whether discussing monumental tsunamis or the innumerable comets in the Solar System this book will enthrall anyone curious about outer space remarkable natural phenomenon or the future of the planet earth Proceedings of the 1st International Conference of Economics, Management, Accounting, and Business Digital (ICEMAB 2024) Echo Perdana Kusumah,Yanto Yanto,2024-12-21 This is an open access book The first ICEMAB serving as an international conference aims to foster cross disciplinary dialogue stimulate innovation and offer fresh insights into the convergence of digital business management accounting and economics It would be beneficial for scholars professionals and legislators who wish to stay informed and engaged in our rapidly evolving digital landscape
