Survival In The City Survival In The City:

Survival of the City Edward Glaeser, David Cutler, 2021-09-07 One of our great urbanists and one of our great public health experts join forces to reckon with how cities are changing in the face of existential threats the pandemic has only accelerated Cities can make us sick They always have diseases spread more easily when more people are close to one another And disease is hardly the only ill that accompanies urban density Cities have been demonized as breeding grounds for vice and crime from Sodom and Gomorrah on But cities have flourished nonetheless because they are humanity's greatest invention indispensable engines for creativity innovation wealth and connection the loom on which the fabric of civilization is woven But cities now stand at a crossroads During the global COVID crisis cities grew silent as people worked from home if they could work at all The normal forms of socializing ground to a halt How permanent are these changes Advances in digital technology mean that many people can opt out of city life as never before Will they Are we on the brink of a post urban world City life will survive but individual cities face terrible risks argue Edward Glaeser and David Cutler and a wave of urban failure would be absolutely disastrous In terms of intimacy and inspiration nothing can replace what cities offer Great cities have always demanded great management and our current crisis has exposed fearful gaps in our capacity for good governance It is possible to drive a city into the ground pandemic or not Glaeser and Cutler examine the evolution that is already happening and describe the possible futures that lie before us What will distinguish the cities that will flourish from the ones that won't In America they argue deep inequities in health care and education are a particular blight on the future of our cities solving them will be the difference between our collective good health and a downward spiral to a much darker place

Survival City Tom Vanderbilt,2010-04-15 On the road to Survival City Tom Vanderbilt maps the visible and invisible legacies of the cold war exhuming the blueprints for the apocalypse we once envisioned and chronicling a time when we all lived at ground zero In this road trip among ruined missile silos atomic storage bunkers and secret test sites a lost battleground emerges amid the architecture of the 1950s accompanied by Walter Cotten s stunning photographs Survival City looks deep into the national soul unearthing the dreams and fears that drove us during the latter half of the twentieth century A crucial and dazzling book masterful and for me at least intoxicating Dave Eggers A genuinely engaging book perhaps because Vanderbilt is skillful at conveying his own sense of engagement to the reader Los Angeles Times A retracing of Dr Strangelove as ordinary life Greil Marcus Bookforum

Surviving the City Xinyang Wang,2001 Exploring the multifaceted Chinese experience in New York City Xinyang Wang persuasively illustrates that economic forces more than racism influenced immigrantsO life decisions

Archigram Simon Sadler,2005-06-24 The first book length critical and historical account of an ultramodern architectural movement of the 1960s that advocated living equipment instead of buildings In the 1960s the architects of Britain s Archigram group and Archigram magazine turned away from conventional architecture to propose cities that move and houses worn like suits of clothes In drawings inspired

by pop art and psychedelia architecture floated away tethered by wires gantries tubes and trucks In Archigram Architecture without Architecture Simon Sadler argues that Archigram's sense of fun takes its place beside the other cultural agitators of the 1960s originating attitudes and techniques that became standard for architects rethinking social space and building technology The Archigram style was assembled from the Apollo missions constructivism biology manufacturing electronics and popular culture inspiring an architectural movement High Tech and influencing the postmodern and deconstructivist trends of the late twentieth century Although most Archigram projects were at the limits of possibility and remained unbuilt the six architects at the center of the movement Warren Chalk Peter Cook Dennis Crompton David Greene Ron Herron and Michael Webb became a focal point for the architectural avant garde because they redefined the purpose of architecture Countering the habitual building practice of setting walls and spaces in place Archigram architects wanted to provide the equipment for amplified living and they welcomed any cultural rearrangements that would ensue Archigram Architecture without Architecture the first full length critical and historical account of the Archigram phenomenon traces Archigram from its rediscovery of early modernist verve through its courting of students to its ascent to international notoriety for advocating the disappearance of architecture

Surviving in the City Harriet Gail Rosenberg, Maureen FitzGerald, 1983

The City and the Super-Organism Marco Amati, 2021-12-02 This book traces how naturalism the idea of a common theory uniting natural social systems has contributed to major shifts in urban planning Beginning in the 17th century when the human body began to emerge as an inspiration for urban planning the book examines the work of medical analyses of city life Responding to the 19th century industrial revolution and 20th century modernism the Second World War and mass motorisation Dr Marco Amati shows how vitalism eugenics evolutionary theories and medical treatments were applied to understand cities and propose new urban forms While critically evaluating the uses of naturalism Amati also observes a renewed interest in the application of sciences to analyse city life arguing that this is essential to help resolve challenges of human induced climate change

Geospatial Approaches to Energy Balance and Breast Cancer David Berrigan, Nathan A. Berger, 2019-07-15 Cancer occurs in specific places and spaces each of which have identifiable geographic coordinates characterized by unique natural built and social characteristics all of which contribute significantly to cancer across the spectrum from etiology through diagnosis treatment and outcomes In the first volume of this series published in 2010 a single chapter was focused on these geographic influences Since then the field of geospatial studies of cancer prevention and control has exploded in approaches and applications Accordingly this volume focuses on what has now become a very specific research endeavor Geospatial Factors Impacting Breast Cancer The book provides important insights into this relatively new and rapidly developing field It should be of value to all students of the Energy Balance Cancer Series and a wide ranging introduction to problems in cancer prevention and control for geographers demographers and other researchers with a geospatial perspective Moreover it provides important information for all oncologists endocrinologists and behavioral modification
