Surviving Together The Olaf Palme Lectures On Common Security 1988:

Common Security and Strategic Reform Andrew Butfoy, 2016-07-27 This is the first study of the strategic dimensions of common security which is set in a post Cold War context The book explores both common security and more recent additions to the debate such as the related idea of cooperative security Separate chapters deal with conceptual issues and pivotal aspects of the contemporary security agenda the amelioration of the security dilemma cooperative defence planning arms control and peace enforcement The book will interest anyone concerned with the reshaping of the international landscape

Surviving Together Radmila Nakarada, Jan Øberg, 1989 **International commissions and the power of ideas**
Editors: Ramesh Thakur, 2006 **Cooperative Security and the Balance of Power in ASEAN and the ARF** Ralf Emmers, 2012-11-12 Emmers questions the dichotomy implicit in this interpretation and investigates what role the balance of power really plays in such cooperative security arrangements and in the calculations of the participants of ASEAN and the ARF He offers a thorough analysis of the influence the balance of power has had on the formation and evolution of the ASEAN and ARF and reveals the co existence and inter relationship between both approaches within the two institutions The book contains case studies of Brunei s motives in joining the ASEAN in 1984 ASEAN s response to the Third Indochina Conflict the workings of the ARF since 1994 and ASEAN s involvement in the South China Sea dispute It will interest students and researchers of the ASEAN and ARF the international politics of Southeast Asia Regionalism and the Balance of Power theory Confidence Building Measures In The Middle East Gabriel Ben-dor, 2019-03-11 Confidence Building Measures CBMs were pioneered in Europe at the height of the Cold War The immediate goal of such measures is to create enough trust between parties in international conflicts to avoid mutually unfavourable sometimes dangerous outcomes due to misunderstandings The long term goal of CBMs is to move the contending parties closer Contemporary Security Analysis and Copenhagen Peace Research Stefano Guzzini, Dietrich Jung, 2003-12-25 This book examines the development of peace research and explores its present challenges focusing on the contribution made by the Copenhagen Peace Research Institute The authors investigate how peace research relates to security studies and international relations providing a comprehensive study of conceptual innovations and a discussion of security *Security as Practice* Lene Hansen, 2013-04-03 This important text offers a full and detailed account of how to use discourse analysis to study foreign policy It provides a poststructuralist theory of the relationship between identity and foreign policy and an in depth discussion of the methodology of discourse analysis Part I offers a detailed discussion of the concept of identity the intertextual relationship between official foreign policy discourse and oppositional and media discourses and of the importance of genres for authors ability to establish themselves as having authority and knowledge Lene Hansen devotes particular attention to methodology and provides explicit directions for how to build discourse analytical research designs Part II applies discourse analytical theory and methodology in a detailed analysis of the Western debate on the Bosnian war This analysis includes a historical genealogy of

the Western construction of the Balkans as well as readings of the official British and American policies the debate in the House of Commons and the US Senate Western media representations academic debates and travel writing and autobiography Providing an introduction to discourse analysis and critical perspectives on international relations this book will be essential reading for students and scholars of international relations discourse analysis and research methodology

Asia-Pacific Security Cooperation: National Interests and Regional Order See Seng Tan, 2014-12-18 New developments in the Asia Pacific are forcing regional officials to rethink the way they manage security issues The contributors to this work explore why some forms of security cooperation and institutionalisation in the region have proven more feasible than others This work describes the emergence of the professions in late tsarist Russia and their struggle for autonomy from the aristocratic state It also examines the ways in which the Russian professions both resembled and differed from their Western counterparts

Elusive Security Laura Neack, 2007 This clear and concise text offers a comprehensive comparison of national international and human security concepts and policies Laura Neack argues that security remains elusive because of a centuries old ethic insisting that states are the primary and most important international actors can rely ultimately only on themselves for protection and must keep all options on the table for national security The author compellingly demonstrates how a state first security ethic ultimately fails to secure states the international community and most important human beings Although security as a concept can be widened to include almost any aspect of existence Neack focuses especially on security from physical violence beginning with efforts by states to defend themselves against violent attack She explores such topics as the internal and external dimensions of security terrorism and defending the homeland threat perception and responses preemptive and preventive wars and other military interventions Next Neack examines efforts over the past century to protect states through the construction of the United Nations international security system and how collective security peacekeeping and peace enforcement have been used in that system Throughout Neack shows that human security has only mattered in terms of servicing the state s security needs a critique she takes up directly in the final chapters A range of short and extended case studies are offered to illustrate the conceptual materials and policy debates over security In this state first world we only can choose between degrees of insecurity true security remains elusive

National, International, and Human Security Laura Neack, 2017-02-16 This clear and concise new edition offers a comprehensive comparison of national international and human security concepts and policies Laura Neack skillfully argues that security remains elusive because of a centuries old ethic insisting that states are the primary and most important international actors that they can rely ultimately only on themselves for protection and that they must keep all options on the table for national security This is particularly apparent with the increase in globalized terrorism and the forced migration of millions of people Although security as a concept can be widened to encompass almost any aspect of existence Neack focuses especially on security from physical violence Case studies throughout bring life to the concepts New cases in this revised edition include

the Syrian refugee crisis and the responses from European states the growth and reach of jihadist terrorist groups and the unilateral and multilateral military actions taken to confront them drug trafficking organizations and the Mexican government's failure to protect citizens the overt use of preventive war by major and regional powers and the increasing American reliance on drone warfare multilateral train and assist operations aimed at peacekeeping and counterterrorism in Africa UN civilian protection mandates in Libya and Côte d'Ivoire and their absence in Syria and how terrorism and refugee crises are intimately connected The first edition of this book was published under the title *Elusive Security States First People Last* in 2007

Raimo Väyrynen: A Pioneer in International Relations, Scholarship and Policy-Making Raimo Väyrynen, 2023-01-03 This book provides a broad overview of Professor Raimo Väyrynen's academic work his role in international research organizations and his contributions to policy debates It offers an interesting review of important political issues during the time span of half a century from disarmament in Europe to the changing relationship between state sovereignty and transnational forces Väyrynen has dealt with the changing agenda of peace and international relations security and the arms race and the world economy This book provides comprehensive analyses of the regional and systemic structure of international relations with the emphasis on conflicts and warfare between nations It argues that while states even smaller ones still matter transnational issues are increasingly important Taking a historical perspective the articles suggest that large scale violence and arms races have been recurrent and cyclical phenomena in international relations These events reflect the deep seated inequalities in the political and economic systems which moreover vary considerably between regions The publication is important reading for any researcher as well as students policy makers and the science oriented public at large Traces the changing agenda of international relations from disarmament and the world economy to the changing relationship between state sovereignty and transnational forces Provides analyses of the regional and systemic structure in international relations with the emphasis on conflicts and warfare Argues that large scale violence and the arms race have been recurrent and cyclical phenomena in international relations Reviews important political issues from peace and conflict in Europe to the changing power relationship in the world

India's National Security Dilemma Rajpal Budania, 2001

Realism, Utopia, and the Mushroom Cloud Michael Bess, 1993-12 Two world wars concentration camps the obliteration of Hiroshima and Nagasaki and continued preparations for nuclear war illustrate the modern world's propensity for mass destruction Yet there have been important signs of resistance to this trend These have included not only the emergence of mass based peace and disarmament movements but activist intellectuals grappling with the growing problem posed by mass violence among nation states Bess examines the lives and ideas of four of these intellectuals Leo Szilard of Hungary and later the United States E P Thompson of England Danilo Dolci of Italy and Louise Weiss of France Realism Utopia and the Mushroom Cloud is a powerful important scholarly work casting new light upon some of the great issues of modern times Readers will learn much from it Lawrence S Wittner Peace and Change Bess seeks to understand the way in

which the creation of the atomic bomb has changed the social and political situation of humankind Are we to be held hostage by military forces or can we transform our situation He describes the lives of four very different activists each with different views on what causes conflict and how best to address conflict Overall this book offers an interesting perspective on life after the atomic bomb In asking ourselves what the possibilities of our future are we can turn to these lives for some guidance This book is informative provocative and encourages one to consider carefully how s he chooses to live Erin McKenna Utopian Studies These four lives researched and skillfully presented by historian Michael Bess make fascinating stories in themselves They also serve as useful vehicles for examining major cross currents of Cold War resistance From Weiss the cynical pragmatist to Szilard the high level fixer to hompson the social reformer to Dolce the spiritual street organizer Michael Bess has woven an illuminating tapestry of human efforts to cope with life under the mushroom cloud Samuel H Day Jr The Progressive Alternative Security and Military Dissent Miles D.
